Introduction and how to use this document

Bexley has adopted Signs of Safety as its practice framework. The purpose of this document is to set out the practice expectations for each part of the service so that everyone is clear about what good Signs of Safety practice looks like in Bexley and so that everyone knows what is expected of them as they carry out their work with children and families.

This document has been developed collaboratively with practitioners and managers, with the underlying philosophy that those closest to the front line are in the most unique position to inform the organisation about what works. Every front line team in the organisation has had the opportunity to use Bexley's 'Practice Framework Reflective Tool' (page 34) to discuss and reflect on what good Signs of Safety looks like in their particular team. The discussions and thinking from these conversations have been drawn together to inform this document. Front line managers have also had the opportunity to use the tool to reflect on their expectations and senior managers have been engaged in the process of setting clear, non-negotiable 'bottom lines' for their service areas. The result is a process that has involved many rich and engaging discussions about practice and a document that has been informed by practitioners and managers at every level and across all service areas.

Discussions with practitioners and managers throughout this process highlighted some specific areas of confusion. As a result, particular attention has been paid to terminology, plans and meetings in pages 8 to 10. Pages 11 to 35 go on to set out the expectations for practitioners working within the signs of safety practice framework by service area. It is anticipated that this section will be used by social workers and managers as a working document to guide them in their day to day practice. Pages 34 to 43 contain the reflective tool that was used to develop the expectations. This tool brings together the values and principles that underpin the work in Bexley, with questions that 'prompt' thinking and reflection on practice and tools that enable practitioners to carry out the work. It is anticipated that social workers and their managers will use this tool to reflect on case work individually or in individual or group supervision.

Whatever practice framework is in place, practitioners and their managers also work within the framework of The Children Act 1989 and must adhere to any associated statutory guidance. Pages 45 to 51 contain the flow charts from Working Together to Safeguard Children 2018 which have been annotated to provide clarity about how we can use signs of safety whilst we follow the statutory process required of us.

Glossary

Appreciative Inquiry:	A line of questioning that purposefully focuses on what has gone well and brings about an understanding about how this has been achieved through reflective questioning in order to support learning and development for the future.
Bottom line:	A minimum set of conditions set by the social worker and their manager about how the safety goal should be achieved.
Cultural Genograms:	A genogram developed with the family that explores family relationships, history, values and beliefs.
Danger statement:	A clear, jargon free statement setting out what we are worried about and what will be the likely impact on the child if nothing changes, where there are worries about the child's safety.
Direct work plan:	A plan detailing the direct work sessions that will be completed with the child and family in order to support them to achieve the safety goals.
Family Finding:	A set of strategies and tools, values and beliefs developed by Kevin A Campbell. The approach is mandated by United States Federal Law for all children and young people in foster care or at imminent risk of placement in the care system and has been recognised as best practice when using the signs of safety approach.
Family Network Meeting:	A meeting attended by the family's naturally connected network whereby the social worker facilitates the family and their network to develop a safety plan for the child
Family Support Meeting:	A meeting in the Family Wellbeing Service that brings together the family and their network and professionals, in order to review the impact of the plan
Group Supervision:	A facilitator, supported by an advisor, leads a case holder and a number of observer/participants through the process of developing a genogram, sharing information about the case and developing danger statements, safety goals and best questions. The purpose of this is to reflect, practice skills and develop next steps
Harm Statement:	A statement of specific incidents of past or current harm to a child
Internal Case Mapping:	A process involving the case holding social worker, whereby information is considered and analysed across the 7 signs of safety analysis domains (harm, danger, complicating factors, strengths, safety, safety goals and next steps)
Mapping with a Family:	The assessment process whereby the social worker engages the family by asking questions in order to gather information and consider and analyse this with the family, across the 7 analysis domains

No order principle:	Section 1 of the Children Act 1989 states (5) where the Court is considering whether or not to make one or more orders under this Act with respect to the child, it shall not make the order or any of the orders unless it considers that doing so would be better for the child than making no order at all
Picture Exchange Communication System' (PECS):	A tool that enables people with little or no verbal communication to communicate using pictures. It enables people to communicate a thought, request or anything that can reasonably displayed or symbolised on a picture card.
Safety goal:	A clear, behaviorally specific, jargon free description of what we need to see to know the child is safe enough to close the case. What will the members of the family be doing that will tell us that the child is safe.
Safety Planning:	The process of engaging the family and their wider network through a series of questions in order to support them to develop a safety plan for the child. The safety plan must address each danger statement
Safety plan:	The plan that the family develops setting out what everyone in the family will do on a day to day basis to keep the child safe, even when things become difficult
Scaling Question:	A question that asks someone to rate something on a scale of 0 to 10, where the 0 and 10 are clearly defined
Solution Focused Questions:	A range of questions that enable conversations about problems/ difficulties to be discussed in a way that opens up possibilities for change by identifying the things that are working and the things that would need to be different for the problem to be resolved.
Three houses work:	A tool for working with children to help them identify their worries, the things they feel are going well and the things they would like to be different
Trajectory:	A clear, agreed timeline of what will happen between 'now' and case closure
Words and pictures work:	A specific way piece of work that helps children understand what the adults involved are worried about and what everyone is doing to sort out those worries, in the form of a story board for the child. The words and pictures story board is developed with the parents and the parent shares this with the child
Worry Statement:	A clear, jargon free statement setting what we are worried about and what will be the likely impact on the child if nothing changes, where there are worries about a child's wellbeing.
Wellbeing Goal:	A clear, behaviorally specific, jargon free description of what we need to see to know the child is healthy and well so that the case can close. Includes what the members of the family be doing that will tell us that the child is healthy and well.

Terminology

Munro, Turnell and Murphy (2016) note that one of the most important developments in the Signs of Safety innovations protect has been to expand the approach to fit across the whole service from early help through child protection and looked after children. Table 1 shows the 'signs of' for each service and table 2 shows the terminology for the analysis categories in the different services.

Table 1

Status	Signs of...
Family wellbeing	Signs of Wellbeing
Child in need	Signs of Safety
Child protection	Signs of Safety
Looked after children and adoption	Signs of Success <i>where there are safeguarding concerns about a looked after child, there will also be some Signs of Safety within the overall Signs of Success care plan</i>
Children leaving care	Signs of Successful Independence
Fostering	Signs of Stability
Leaving Care	Signs of Stability
Children with Disabilities	
- review only	Signs of Safety
- child in need	Signs of Safety
- child protection	Signs of Safety
- children looked after	Signs of Success

Table 2

Assessment Type	What Are We Worried About?		What's Working Well?		What Needs To Happen?	
	Past	Future	Complicating Factors	Existing Strengths	Existing Solutions	Goals
Signs of Safety	Harm	Danger	Complicating Factors	Existing Strengths	Existing Safety	Safety Goals
						Next Steps
Signs of Wellbeing	Wellbeing Concerns (past)	Critical Worries (future)	Complicating Factors	Existing Strengths	Existing Wellbeing	Wellbeing Goals
						Next Steps
Signs of Success	Worrying Behaviour (past)	Critical Worries (future)	Complicating Factors	Existing Strengths	Existing Success	Success Goals
						Next Steps

Types of meetings

'Nothing about us without us'

The signs of safety approach emphasises the need to foster open, honest and respectful relationships with families. This means social workers and other professionals have to have difficult conversations with families in a compassionate and respectful way. In Bexley, when we convene meetings to discuss worries about a child, we will always involve family members in these meetings.

The only exceptions to this would be in relation to strategy meetings/discussions or legal planning meetings. There may be a need for a meeting to take place without the family when there are strong disagreements within the professional network that are impacting on interagency relationships and a meeting is needed to develop a more shared understanding of the worries and an improvement of working relationships. In these instances, the family should be aware that a meeting is taking place, unless this would place the child at further risk. The outcome of the meeting should be discussed with the family as soon as possible after it has taken place

Thought should be given to the timing of meetings to minimise the number of meetings that family members and social workers are attending. For example, a review family network meeting may take place at the start of a CIN or core group meeting, with the professionals joining at a later time.

Practice expectations and bottom lines

*You need to remember
the bottom line!*

SOS principles Bexley values Family Wellbeing Practice Expectations and Bottom Lines

Working relationships at the heart of practice

Child-centered
Family led

- We share the service leaflet when we first visit a family to enable families to understand and be clear about what the service offers and how we can provide help and support.
- We are always respectful towards children and their families
- At the initial visit, the family are supported to complete a genogram, enabling careful exploration of the family's wider family/support network.
- The family are encouraged to involve their wider network in developing the family support plan through a family network meeting and in reviewing it in ongoing family network meetings and/or family support meetings.
- We use the three houses (or equivalent) during the initial visit with the child to develop an understanding of the child's worries, the things the child feels are going well and the things they would like to be different.
- We use a variety of direct work tools from the direct work kit in our ongoing work with children and their families as part of the support to enable the family to move towards their wellbeing goals.
- Words and pictures explanations are developed with parents and used to help children understand what the adults are worried about and how everyone is working together to help sort out these worries.

Family Network Meetings

- 'Family finding' tools and techniques are used to help the family develop their naturally connected support network
- When the family wellbeing assessment confirms that there are worries about a child, a family network meeting is arranged at the earliest point and is attended by the people who are naturally connected to the child and their family
- At the family network meeting, the draft worry statements and wellbeing goals are shared and refined with the family and their network. Members of the family's network are asked to scale the situation from 0-10 in relation to each worry statement/ wellbeing goal
- Bottom lines are kept to a minimum and shared clearly with the family
- Family members and their informal network are invited to develop a plan that will address each worry
- We facilitate the process by asking questions that help to test out the wellbeing plan
- Everyone in the network gets a copy of the plan developed

SOS principles	Bexley values	Family Wellbeing Practice Expectations and Bottom Lines
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> We triangulate what children, parents and professionals are telling us, in addition to what we observe the child and parents doing At family support meetings the progress and impact of the family plan is mapped with the family and professionals
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> We use scaling questions with the child and their family members to consider and understand the children's wellbeing and each person's view of the family situation/the impact the family plan is having. We carefully prepare our sessions with children and families The visits and family plans are clear about the next steps, the work that will be completed with the family, how and why.

Bottom Lines

- In all assessments the analysis will include reflection on the complicating factors, a clear worry statement with a paired wellbeing goal and clear next steps
- Words and Pictures explanations will be developed with all families to help children understand the worries and what the adults are doing to sort out the worries
- A case mapping will take place for all cases being considered for transfer to children's social care
- A brief case mapping will take place with the family during the family support meeting
- Family support meetings will use scaling questions to understand the views and experiences of children and their families to help understand how the support offered is helping to make a difference

SOS principles	Bexley values	MASH Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> We look carefully through the history and consider what life is like for the child We check it is convenient to speak with family members when they call We always speak with family members respectfully We don't leave voicemail messages on a Friday for parents to worry about over the weekend We carefully go through each part of the concern with parents, seek to understand their view about this and record their response We always ask for consent to speak with other professionals about the child/family, unless to do so would place the child at risk of harm. We always consider carefully the implications to the child and to the parents if we are considering overriding parental consent to talk to other professionals. When a decision has been made to allocate to the R&A team for an assessment, practitioners in the MASH explain to parents that in Bexley we will work with them and their wider network and will support them and their network to identify solutions to the difficulties. The MASH practitioner will encourage the parents to start thinking about who in their network they would like to involve.
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> We always check the basic details to make sure they are correct and make sure we are aware of any previous addresses that the family have lived. We map referral information into what's working well and what we are worried about. We ensure that when we are speaking with professionals that we ask questions that help us to be clear about the specific, observable behaviours of the parents/children/ others that we are worried about. We ensure that we are clear about what is fact and what is judgement and that any fact is accurate. We always ask questions to find out about the strengths and safety that exists within the family. We always speak to the people/professionals that know the child/family best. If the case is going to progress to the assessment team, we always create draft danger statements and safety goals and share these with the parents in order to explain clearly to the parents why we are progressing to assessment. We always share with the referrer our next steps.
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> We ensure we are clear about what information we need to get before we make contact with a parent or professional.

Bottom Lines

- Social Workers ask referrers questions that help us to understand the past and current harm; i.e. 'what specifically are the parents doing', 'how often' 'how severe', 'when was the last time' 'what was the worst time' 'what is the impact on the child?'
- Social Workers deliberately ask questions to the referrer and parents that enable us to understand the strengths and the safety that exists in the family
- Social Workers develop danger statements for cases that transfer for assessment and share these with the parents, in order to explain clearly why we are progressing to assessment
- We always feedback the outcome of the referral to the family and to the referrer

SOS principles	Bexley values	R&A Practice Expectations and Bottom Lines
Working relationships at the heart of practice	<p>Child-centred Family led</p> 	<ul style="list-style-type: none"> On the first visit to a family, we introduce ourselves and the way that we work with families in Bexley and what they can expect from us. On this visit we use the draft danger statements that MASH have developed to explain why we are starting an assessment. From the first visit to a family, we complete a cultural genogram with the family and start to map out the worries/strengths and safety together with the family We carefully plan and undertake three houses (or equivalent) with the children as part of the assessment in order to understand their worries, the things they feel are going well, and the things they want to be different We spend time understanding the child and members of their family's' beliefs, values, religion, family history and culture and what these mean to them personally The work we do with the children is captured in the assessment and shared with the parents When children are very young, we observe how they look, behave and interact with others in order to understand what they are telling us When parents say they have no one in their naturally connected network, we sensitively but persistently ask questions to explore this further, use the 'family finding' tools and work with parents to help develop the informal network of support around the family <p>Family Network Meetings</p> <ul style="list-style-type: none"> 'Family finding' tools and techniques are used to help the family develop their naturally connected support network When the initial visit to the family confirms that there are worries about a child's safety, a family network meeting (FNM) is convened and is attended by the people who are naturally connected to the child and their family At the family network meeting, we share and refine the draft danger statements and safety goals with the family and invite family members to scale the situation from 0-10 in relation to each danger statement/safety goal Bottom lines are kept to a minimum and shared clearly with the family Family members are invited to develop a plan that will address each worry We facilitates the process by asking questions to help test out the safety plan Everyone in the network gets a copy of the safety plan The safety plan is incorporated into the child in need or child protection plan. <p>Rapid Family Network Meetings</p> <ul style="list-style-type: none"> In an emergency situation where the child's immediate safety is a worry, a strategy meeting takes place. Once the strategy meeting has taken place, the social worker and their manager do their upmost to convene a rapid family network meeting on the same day (which could be in the office/at a hospital). The family network meeting focuses on what needs to happen to keep the child safe for the next....days Contingency planning takes place to identify a foster placement in the event that the network are unable to identify a satisfactory safety plan

SOS principles	Bexley values	R&A Practice Expectations and Bottom Lines
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> The first thing we do when we are allocated a case is to make time to read the file and understand the history and the likely impact of this on the child. A chronology is developed to support this understanding. We triangulate information from the mapping with the family, with the information about harm/strengths and safety from the professionals that best know the child, what the child is saying and what we observe the family doing. When other professionals are worried, we help them to be clear and specific about their observations, clarifying how often, over what period and how serious these worries are. We purposefully ask family members and professionals questions to find the things that are going well and the things the family are doing that keep the child safe, even when things are difficult We always map the information across the 7 analysis domains We use research about what increases or mitigates the risks (e.g. in relation to domestic violence, mental health, attachment, drug and alcohol misuse, CSE, sexual abuse) to inform the analysis across the 7 domains and to provide evidence to support our thinking about how worried we should be. In strategy meetings/discussions and legal planning meetings, information is considered across the 7 analysis domains. We create danger statements that are clear, specific and jargon free and these are shared with families so they are clear about why we are involved. Every danger statement has a linked safety goal that is clear and specific and describes what we need to see in order to close the case (or return the children to the parents care) and these are shared with families so they are clear about what they need to do.
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> Before a visit or meeting, we have made time to think through and be clear about what we are trying to achieve, how we will achieve it and how we will know we have been successful. We prepare solution focused questions before mapping with families or facilitating family network meetings.

Bottom Lines

- Social Workers use mapping with families as the basis of their assessment
- Family network meetings take place within 15 working days of an assessment being started on cases where the initial visit has confirmed that there are worries about the child's safety
- Social Workers always use the three houses or equivalent to carefully explore children's worries, the things they feel are going well and the things they want to be different
- Social Workers always use the 7 analysis domains to gather and analyse the information

SOS principles	Bexley values	Transfer of Cases Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> When we are handing a family over to another team or worker, we will always explain to the child and the family why this is happening When we are handing a family over to another team or worker we introduce the new worker to the child and family, go through the danger statement and safety goals with the family and new worker and invite the family to talk through the safety plan
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> The danger/worry statements, existing strengths and safety, safety/wellbeing goals and the safety/wellbeing plan will be shared at transfer panel The first thing the new we do when we are allocated a new child and family, before making contact with the family is to book in some time in our diary to read the file and understand the family history. This includes reading chronologies and previous assessments
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> When we are allocated a new family, we ensure that we are clear about the safety goal and how the plan aims to achieve this goal

Bottom Lines

- When families transfer between services there will always be a safety plan that has been developed with the family and their wider network via a family network meeting
- When families transfer between services, there will always be a clear trajectory of work that has been developed and shared with the family

SOS principles	Bexley values	Preparing for a child protection conference Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> The mapping we have completed with the family for the assessment/S47 enquiry is brought to the ICPC Three houses (or equivalent) that we have completed with the child(ren) for the assessment is brought to the ICPC A family network meeting takes place prior to the ICPC and a safety plan is developed. The safety plan is brought to the ICPC We explain to the child and the family what a child protection conference is and what will happen in this meeting The CP chair has a pre-meeting with the family before the conference starts in order to check their understanding of what is happening, why the conference is taking place and to understand their views When children or young people attend the initial or review conference, the CP chair meets with them before the conference starts to find out what has been happening from their perspective and to understand their views
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> Social Workers and their managers always have a consultation with a CP chair, prior to convening a CP conference. In this consultation, CP chairs will always check that danger statements have been developed with the family, that the assessment (mapping) has been developed and shared with the family and that the Social Worker has engaged the network to develop a safety plan The CP chair facilitates a discussion in the consultation about how the harm/danger, strengths and safety have been analysed in order to arrive at a judgement
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> The CP chair develops questions for the conference based on the case mapping (assessment), the family safety plan and the discussions with the social worker and their manager

Bottom Lines

- A family network meeting will have always taken place prior to conference and a safety plan developed with the parents and wider network
- Prior to an initial child protection conference, time will have always been spent with the child exploring what they are worried about, what is going well and what they want to change via the three houses worksheet, or equivalent. And this will have been shared with the parents

SOS principles	Bexley values	Child Protection conference Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> A safe, accessible, confidential setting is provided for the Conference to take place We always speak respectfully with family members throughout the conference We (CP chairs) ensure that the child's voice is clear in the conference, either through encouraging their attendance or through sharing the direct work that has been done with the child (3 Houses or other). CP chairs ask questions that encourage the family to identify what they currently do to protect and look after their child Parents are invited to show their understanding of professional worries Next steps always include the social worker working with the family to develop a words and pictures version of the safety plan for the child (if this has not been completed already)
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> The case is mapped, building on the previous/existing mapping with the family The Social Worker presents the harm statements and the existing strengths and safety, the current danger statements and safety goals The CP chair checks the facts with the family CP chairs use a questioning approach to probe for concrete evidence of the impact of events on the child in order to test that the assessment is proportionate and risk-sensible Where families do not agree there is a problem, CP chairs use their authority skilfully to ask families to provide evidence that things are not as they seem e.g. by using a "same but different" approach: e.g. would you be worried if you were me? What can you do to reassure people/so other people are not worried? CP chairs use questions to explore the current safety plan and people's confidence in the plan in keeping the child safe in relation to the dangers
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> The SOS framework is used to keep focused within the Conference; using the danger statement and safety goals to inform the process: moving from where we are now to where we all want to get to for the child. The time in Conference is used primarily to test out the robustness of the safety plan; questioning is used to help everyone to feel satisfied that it will work, especially at trigger times/ stress points. A focus on the safety goals is maintained.

Bottom Lines

- Child protection chairs use scaling questions to understand the views of the family and to decide the level of help and support needed
- The child protection chairs summary report will use the 7 domains to demonstrate the decisions made at conference
- There will be a clear safety plan reviewed at every child protection conference to help us understand how the children are being kept safe

SOS principles	Bexley values	Family Support and Child Protection Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> We always speak with children and family members respectfully We continue to listen and understand the situation from each individual family member's point of view. We spend time understanding the child and their family's beliefs, values, religion, family history and culture and what these mean to each of them personally We spend time with children and seek to understand the things they feel are going well, the things they are worried about and the things they want to be different We complete words and pictures work with families so that all children have a clear explanation of why we are involved and what the adults are doing to keep them safe/sort out the worries When new assessments are started, we use case mapping with families as the basis of this assessment <p>Family network meetings</p> <ul style="list-style-type: none"> 'Family finding' tools and techniques are used to help the family develop their naturally connected support network We continue to work with the whole family network; the effectiveness of the safety plan is reviewed through regular family network meetings. Where possible, review family network meetings are arranged to fit in with core groups and CIN meetings (i.e. first half is family and their network with professionals to join) to minimise the number of meetings that families have to attend. In review family network meetings, questions are prepared and used to explore what the family have done well in order to keep the children safe and to dig into the detail of how they managed to do this In review family network meetings we explore any worries (family or professional) about the safety plan and what needs to happen to address these worries
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> The first thing we do when a child and family is allocated to us is to make time to read the file and understand the family history, including reading previous assessments We continue to triangulate information from family members with information about harm/strengths and safety from professionals, with what the child is saying and what we observe the family doing. When other professionals are worried, we help them to be clear and specific about their observations, clarifying how often, over what period and how serious these worries are. We purposefully ask family members and professionals questions to find the things that are going well and the things the family are doing that keep the child safe, even when things are difficult In CIN meetings and core groups, we use scaling questions to measure the progress towards the safety goal and the impact of the safety plan In strategy meetings/discussions and legal planning meetings, information is considered across the 7 analysis domains Danger statements are clear, specific and jargon free, and are shared with families so they are clear about why we are involved. Danger statements are reviewed as the case progresses

SOS principles	Bexley values	Family Support and Child Protection Practice Expectations and Bottom Lines
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> • We work with the family and professionals to develop a trajectory so everyone knows what will happen and when, up to the point of case closure • Before a visit or meeting, we have made time to think through and be clear about what we are trying to achieve, how we will achieve it and how we will know we have been successful • We check with the effectiveness of the safety plan when visiting children and their families • Scaling questions are used in all meetings to check our progress towards the safety goal • We always make sure there is a clear contingency plan in place detailing what will happen if the family are not able to carry out or sustain the safety plan

Bottom Lines

- For each case there is a clear trajectory recorded, setting out the end point (case closure) and detailing work (including the direct work plan) that will be undertaken with the child and parents and the points at which the safety plan will be reviewed within family network meetings
- All safety plans should be developed with the family taking the lead and the social worker facilitating the process
- All plans should be clear, jargon free, connected to the danger statements and safety goals and should define what the family will do on a day to day basis to keep the children safe as well as what professionals will do
- For every family we work with the parents to develop words and pictures explanations of why we are involved and what the safety plan is, and these are shared with the child or young person and the wider network
- Group supervision takes place at a minimum of monthly

SOS principles	Bexley values	Children with Disabilities Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> When we first visit a family, we will always spent time explaining clearly to the family what our role is and what can be expected from us We make use of observations of children in different settings; i.e. school and home, paying attention to what they are telling us through their behaviours and interactions We observe children's interactions with their parents, peers and other significant people in their lives We use communication aid tools such as 'Picture Exchange Communication System' (PECS) for children with limited speech We use team iPads with picture aids to help children communicate When there are worries about the safety of a child, a family network meeting is convened For any new referral, a family network meeting is convened <p>Family Network Meetings</p> <ul style="list-style-type: none"> 'Family finding' tools and techniques are used to help the family develop their naturally connected support network The family network meeting is attended by the people who are naturally connected to the child and their family At the network meeting, the draft danger statements and safety goals are shared and refined with the family. The family is invited to scale the situation from 0-10 in relation to each danger statement/safety goal Bottom lines are kept to a minimum and shared clearly with the family Family members are invited to develop a plan that will address each worry The social worker facilitates the meeting by asking questions to help test out the safety plan Everyone in the network gets a copy of the safety plan The safety plan is incorporated into the overall plan for the child We continue to work with the whole family network; the effectiveness of the safety/wellbeing plan is reviewed through regular family network meetings In review family network meetings, questions are used to explore what the family have done well in order to keep the children safe/well and how they managed to do this
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> Every case has a chronology that sets out the significant events and the impact on the child and highlights the patterns. When a decision needs to be made on a complex case, a case mapping takes place, including the family We triangulate what professionals say, what parents say and what the child is saying (either verbally or through their behaviours and interactions) We consider whether the child is enjoying and achieving and succeeding in line with their potential We use research to review and make decisions about whether packages should be amended We use the Munro decision making tree to help consider the options available to us when making decisions We will always consider when making decisions; what is the risk, how can this risk be managed, what support is available and what will be the impact if we do or don't put this support in

SOS principles	Bexley values	Children with Disabilities Practice Expectations and Bottom Lines
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> • We use scaling questions to measure progress/confidence in the care package • Appreciative inquiry takes place regularly in team meetings in order to learn from good practice • Before visiting a family, we always consider what we want to achieve from this visit, what we need to know and how we will know we have achieved the goal for the visit

Bottom Lines

- Family network meetings take place for all new cases coming into the children with disabilities service, within 15 working days of allocation
- We are always clear about the actual support being provided, the outcome we are aiming to achieve in providing this support and who will be providing the support. This is recorded clearly in the assessment
- All active child in need cases have danger statements and safety goals that have been shared with parents and these will be incorporated into the case summary
- Every child should have a version of their plan that they can understand, in line with their age and level of understanding. For those children who are more able, a words and pictures version of the plan is developed with the parents and shared with the child
- Group supervision takes place at a minimum of once per month

SOS principles	Bexley values	Looked After Children's Teams Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> • We always speak with children, young people and their families respectfully • We spend time with children, getting to know them and ensure that the conversations we have with them help us to understand the things that are going well for them, the worries they have and the things they want to happen/change • We spend time understanding the child or young person's beliefs, values, religion, family history and culture and what these means to them personally • When we tell a child we will do something, we always ensure we follow through and do so in a timely way • We always ask questions that help understand the things that are going well • Where a child's immigration status is unclear, we are pro-active in contacting the home office to clarify this • We ensure that each child has a version of their care plan that they understand and that this is an active, living document that is regularly used and updated • When there are worries about contact, family network meetings are used to enable the family to find solutions to these worries • When there are worries about kinship placements, family network meetings are used to enable the family network to develop a safety plan • When we are planning to return a child or young person home, family network meetings enable the network to develop a safety plan • When there are worries about children/young people who are going missing, family network meetings are used to enable the child/young person's network to develop a safety plan <p>Family Network Meetings</p> <ul style="list-style-type: none"> • 'Family finding' tools and techniques are used to help the family develop their naturally connected support network • At the family network meeting, the social worker shares and refines the draft danger statements and safety goals with the family/carers and their network and invites everyone to scale the situation from 0-10 in relation to each danger statement/safety goal • Bottom lines are kept to a minimum and shared clearly with the network • Members of the network are invited to develop a plan that will address each worry • The social worker facilitates the process by asking questions to help test out the safety plan • Everyone in the network gets a copy of the safety plan • The safety plan is incorporated into the overall signs of success plan for the child • The safety plan is reviewed and refined through review family network meetings

SOS principles	Bexley values	Looked After Children's Teams Practice Expectations and Bottom Lines
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> When making any decision about a change in a child's care arrangements, we will map and analyse information across the 7 analysis domains We continue to triangulate information from carers/family members with information from professionals and with what the child is telling is (verbally and through their behaviours) Court statements always spell out harm and danger statements, complicating factors and the existing strengths and safety. When other professionals are worried, we help them to be clear and specific about their observations, clarifying how often, over what period and how serious these worries are.
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> We spend time preparing our visits to children and young people and are clear about what we want to achieve from this visit, how we will achieve this and how we will know we have achieved this outcome We have a clear trajectory/timeline of the direct work we are completing with the child, that is linked to their individual care plan Scaling questions are used with children and young people to monitor change and to explore their perspectives When a decision has been made to return a child home, there is a clear trajectory setting out what will happen, up to the point of case closure For children who are looked after long term, there is a clear trajectory for them through adolescence and into adulthood

Bottom Lines

- We always work on the basis that children are best living with their families, so long as it is safe for them to do so. If we are thinking about applying to the courts for an order, we always consider the 'no order principle' (see glossary) and carefully ask ourselves and each other, 'what would be better for this child if an order was in place?'
- For all children for whom care proceedings are issued, we will work with the family to create a words and pictures explanation of why we are worried and what is happening to sort out these worries and will share this with the children. The words and pictures work will be filed with social workers statement
- A permanence plan is developed for every child by the child's second looked after children's review. The child is clear about this plan and it is reviewed at every review with every option being carefully considered, including the child returning home/or to someone within their naturally connected network
- A safety plan will always be developed through a family network meeting when there is a plan for reunification. If a child returns themselves home unplanned, a family network meeting will always take place at the earliest opportunity to support the family and their network to develop a safety plan
- A safety plan will always be developed through a family network meeting when there is a plan for a supervision order along with a clear, agreed trajectory setting out what will happen from the point the order is granted to the point of case closure
- When there is a plan for a reunification, there will always be a clear, agreed trajectory so everyone knows what will happen and when until the point of case closure
- All children must have a version of their plan that they understand
- Group supervision takes place in every team at least one per month
- Children and young people are encouraged to chair their reviews
- IRO's check that family finding work is being done for all children and young people who are looked after so that we can be re-assured that we are prioritising children's right to be connected with their natural networks

SOS principles	Bexley values	Looked after children's reviews Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> We talk with the child about their review ahead of the review and go through their care plan with them We ask the child who they would like to attend their review and encourage them to chair their own review The IRO meets with the child ahead of their review Any family member that the child has contact with has input into the review, if they are not able to attend we will contact them to obtain their views
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> The looked after review considers how well we are working towards the success goal; scaling questions are used to measure progress and gain differing views Changes to the care plan are based on information/observations from the carer, the family, the child, other professionals who know the child and the social worker
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> IRO's ask solution focused questions to explore how the care plan is helping

Bottom Lines

- The pre-meeting report for the review is written primarily for the child/young person and is written in a way that they can understand
- The looked after review is the child's meeting; they are the most important person at the meeting and hearing what they have to say is central to the review

SOS principles	Bexley values	Transfer between looked after children and leaving care Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> From the age of 14 years old (at the latest) we start to talk with the young person and their carer about developing independence skills i.e. through learning how to cook basic recipes, managing money, helping with the shopping, using the washing machine and cleaning their bedrooms Between the age of 14 and 16 years old, we talk with the young person to understand their aspirations for their education, career and housing. We think carefully with them about what would need to happen for them to achieve these aspirations and plan for this in their care plan and then pathway plan We pay particular attention to building and strengthening the young person's informal networks from the age of 16 years old. The pathway plan is in the young person's own words
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> Pathway plans are unique and specific to each particular young person and are based on their individual needs, strengths, areas of development and aspirations We have high aspirations for our young people and put everything possible in place during this transition period to support our young people to achieve in all areas of their life. We discuss, agree and develop contingency plans with young people in the event that they don't quite manage to achieve what they were hoping in relation to their hopes and aspirations
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> We use scaling questions to help the young person identify the areas of independence they feel confident in and the things they feel they need more help with We facilitate the pathway planning process through a questioning approach but let the young person take the lead in developing their pathway plan We develop a clear trajectory of what will happen throughout this transition period in order to support our young people to flourish and develop into a confident, independent, young adult

Bottom Lines

- Young people take the lead in developing their pathway plans and the pathway plan is written in the young person's own words
- Safeguarding is at the heart of everything we do. We try to help young people make the right choices and when they make a mistake we are there to help them
- We never give up on someone

SOS principles	Bexley values	Leaving Care Teams Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> We see the young person/young adult on a regular basis and have an open line of communication through text/email and WhatsApp We talk to the young person about their relationships and the people in their lives who are important to them We spend time understanding the young person/young adult that we are supporting's beliefs, values, religion, family history and culture and what they mean to them personally Where a young person/young adult's immigration status is unclear, we are pro-active in contacting the home office to clarify this We support young people/young adults to link into local community groups to help them to develop their networks When young people/young adults are reluctant to accept our help and support, we keep persisting and trying different ways to build a relationship with them and offer support We help care leavers support each other by linking them in with 'positive journeys' Where there are worries about a young person/young adult, advisors work hard to engage the network around the young person/young adult in a network meeting with the young person/young adult's consent We the family finding tools to explore and build the young person/young adults connection to their natural network <p>Network Meeting</p> <ul style="list-style-type: none"> At the network meeting, we share and refine the draft danger statements and safety goals and invite members of the young adult's network to scale the situation from 0-10 in relation to each danger statement/safety goal Network members are invited to develop a plan that will address each worry The personal advisor facilitates the process by asking questions to help test out the safety plan Everyone in the network gets a copy of the safety plan The safety plan is incorporated into the overall plan (see page 8)
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> We always ask questions that help us understand the things that are going well When there are worries about a care leaver, personal advisors map these out with the young person/young adult When there are worries about a care leaver, a case mapping takes place and we map the information across the 7 analysis domains When there are worries about a care leaver clear, jargon free danger statements and paired safety goals are created and shared with them When there are worries about a young person/young adult about their safety or wellbeing, we will always consider a referral to adults safeguarding and make a referral if required. We use our danger statements to explain to the young person/young adult why we are worried and why we are referring to adult safeguarding

SOS principles	Bexley values	Leaving Care Teams Practice Expectations and Bottom Lines
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> • We help care leavers identify their own goals in the pathway planning process • We help care leavers develop clear trajectory's for achieving their goals • We use scaling questions to help care leavers assess their progress towards their goals • We ensure pathway plans are clear and jargon free and are written by/in the words of the young person/young adult. • We prepare for our visits so that we are clear about what we want to achieve before we meet the young person/young adult and how we will know that we have achieved what we hoped

Bottom Lines

- When there are critical worries about young people/young adults in relation to mental health, substance misuse or domestic violence, personal advisors and their managers will always work hard to support the young adult/young person and their naturally connected network to attend a network meeting and develop a safety plan
- If a care leaver loses their accommodation unexpectedly, personal advisors and their managers will always work hard to get their naturally connected network together to help them to develop a plan
- When a young person/young adult that we are working with makes a mistake; we are there for them

SOS principles	Bexley values	Fostering assessment team Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> Fostering assessments are clear, straight forward and jargon free Abbreviations are not used in our fostering assessments or literature We carefully explore the potential carers support network When we have worries about a potential foster carer/special guardian, we are honest and clear about these from the start so that people have as much chance as possible to make changes When vulnerabilities or worries about a potential special guardian arise during an assessment, we arrange a family network meeting with the potential carer and their network to support the network to develop a plan that addresses these worries. In family network meetings we share danger statements, safety goals and scaling questions, invite the network to scale and support the network to develop a plan. Bottom lines are kept to a minimum
Adopt a stance of critical inquiry	Adopt a stance of critical inquiry 	<ul style="list-style-type: none"> We explore how family members have parented their own children We always observe the carers with the child when completing SGO assessments We obtain references for potential foster carers and special guardians We observe potential foster carers interactions with each other within the training group work to inform their assessment
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> We carefully prepare questions before we meet with the potential carers we are assessing We explore and draw out strengths with potential carers and these are reflected in the foster carers assessment We explore how potential carers have used strengths and resources to get through different situations There is a clear trajectory from first visit to panel and carers know about this process In the skills to foster training, we check in with the group regularly about any worries and seek feedback at the end

Bottom Lines

- Assessment of potential foster carers and special guardians always uses the 7 domains to analyse the information
- Special Guardian support plans are developed using the principles of safety planning
- Group supervision takes place fortnightly

SOS principles	Bexley values	Fostering Support and Supervision team Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> We provide a welcome book to the child's social worker to give to the child. This provides information, mainly in picture form about the carers and their home In all planned moves, we will speak to the child's social worker and foster carer to arrange a visit to the placement We visit carers on a monthly basis Whenever difficulties arise that might impact on stability, a placement stability meetings is arranged as soon as possible to ensure that these difficulties don't escalate Placement stability meetings will always involve the child and will involve their wider birth family wherever possible Within permanency planning meetings, the option of returning home will always be considered Foster carers birth children are appreciated through an annual event and have regular group activities to talk about fostering and how it is affecting them. Birth children have opportunities to participate in developing forms such as the annual review feedback form The team arranges an annual appreciation event for foster carers and provides regular coffee mornings Foster carers are spoken with as part of the collaborative audit
Adopt a stance of critical inquiry	Evidence based Risk sensible 	<ul style="list-style-type: none"> All foster carers will have a chronology on their file that includes any allegations, placement breakdowns, significant events and changes of approval in order to notice patterns Within the placement stability meetings, information is mapped and analysed across the 7 domains with the carers, the child and the birth family whenever possible Once the child is placed in a new placement, we develop a 'safe care' plan with the child's social worker, foster carer and the child. We work through the individual safe care plan document, identifying any safety concerns and developing a plan with the foster carer about how these will be managed in the child's day to day care. Whenever there is a stability meeting, we update the safe care plan to reflect this Group supervision takes place fortnightly in the team
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> We ensure that regular permanency planning meetings take place for all looked after children 11 years plus from eight weeks after they become looked after Visits are planned and have a clear purpose, linked to the safe care plan We use scaling questions with foster carers in their visits to scale stability/specific issues. We ask solution focused questions to identify what's working well and what we are worried about. All placement stability meetings will have clear danger statements and stability goals that are stated in a way that children and carers can understand

Bottom Lines

- All placement disruption/maintenance meetings use the SOS framework and map across the 7 domains
- Supervisory visits to foster carers use a scaling question to scale the stability and explore the reasons for the number scaled at/what needs to happen to move up the scale. These visits explore what's working well and what everyone is worried about against the 5 outcomes
- Words and pictures work is used to explain transitions or disruptions
- Words and pictures work is always used to provide an explanation to the child of a change in their care arrangements
- Group supervision takes place at a minimum of fortnightly

SOS principles	Bexley values	Adoption Practice Expectations and Bottom Lines
Working relationships at the heart of practice	Child-centred Family led 	<ul style="list-style-type: none"> • We quality assure child permanence records and offer support to social workers to ensure the children's views and wishes are sought in respect of their birth family, contact and understanding of the care plan and these are included in the Child Permanence Report. • When placing a child in a foster to adopt placement, birth families are given a clear understanding of what this means; they are provided with the Fostering to Adopt birth family leaflet and given the opportunity to ask questions and meet the carers. • When assessing prospective adopters, we work alongside the family to build a relationship and create an experience that enables learning and sharing. We work with openness, honesty, respect and empathy, drawing together strengths and vulnerabilities in a safe setting. At the start of the assessment a plan is agreed between the family and the worker around areas for discussion and timescales. • As chair of all Permanency Planning meetings for children 10 and under, the adoption lead will ensure a full discussion is held within the meeting around the views of the child and their understanding of our involvement and record if this work is being carried out. • We support applicants to think about who in their network can support them and in what way. We also encourage applicants to consider who in the event of serious illness or death would take on the role of guardian for their adopted child the same as if it was a birth child. Family members will be seen and interviewed as part of the assessment process. • When a plan for adoption has been agreed for a child, we will ensure the birth family receive the Bexley leaflet "has adoption been identified as a plan for your child?" and offer independent counselling • We compile all words and picture explanations and any other direct work on file to use as basis for a life story book. The family finding social worker will liaise with the foster carer and engage with the birth family to gather further information and photographs to produce a full life story book • All adopted young people at age 18yrs are provided with a "services for adopted adults who want to trace birth relatives" leaflet. • Post adoption support for the family can include therapeutic life story work which will provide the young person with a better understanding of their life history and their identity. • We make young people aware of the opportunity to attend the local Adoption social club.

SOS principles	Bexley values	Adoption Practice Expectations and Bottom Lines
Adopt a stance of critical inquiry	Adopt a stance of critical inquiry 	<ul style="list-style-type: none"> When assessing prospective adopters we use a range of tools to enable the family to share their personal experiences, reflect and gain an understanding of the impact of this experience on them and others. When assessing prospective adopters, information is gathered from several sources to ensure the assessor gains a holistic view of the family's strengths and vulnerabilities. Prospective adopter reports will include information from a range of sources, applicants, family, friends, employers, health and other professionals. Tools used to gain this information will include Coram BAFF Prospective adopter report, genograms, eco maps and attachment style interview questioning. We will analyse information gathered and give a clear recommendation that will include strengths and vulnerabilities as part of the summary. When there are complicating factors with adopter assessments or where issues have arisen during assessment, we explore this further through case mapping and group supervision. This helps to identify strengths and vulnerabilities and highlight the area of concern which can then be shared with the family. When working with prospective adopters we work in an open, honest and transparent way. If concerns arise before or through assessment, applicants are made aware of the concerns and discussions held on how the issues can be resolved We do not look for perfect parents but adopters who are resilient, committed and open to learning. Assessing social workers will explore fully with adopters any negative experiences and the impact this has had upon them and others, how they managed this experience and how this will play out in their role as adoptive parents
Land grand aspirations in everyday practice	Solution focused Focused and purposeful 	<ul style="list-style-type: none"> We complete a stage 2 agreement with families before starting the assessment; this will include a predicted date for panel. This provides the applicants with a clear understanding of dates/times and what each session will entail. We ensure that we are being open and transparent with the family and explain the reason for any deviation from the existing plan or need for further exploration of a certain area We are clear with prospective adopters from the very beginning around bottom line requirements, these can be found on our recruitment literature and stated again at open evenings. If these cannot be met then families will be informed immediately and given clear reasons why we are unable to proceed with their applications.

Bexley Signs of Safety practice framework reflective tool

The practice framework reflective tool is based on Marie Connolly's (2007) 'Practice Frameworks: Conceptual Maps to Guide Interventions in Child Welfare'. The tool was developed in Bexley and brings together the principles that underpin our work in Bexley with clusters of reflective questions that aim to support reflection on the quality of practice relating to each principle. Linked to each section are the tools that practitioners can use to support work that is underpinned by the relevant principles. The tool is in two parts; the first is a poster that summarises the tool on a single page and can sit on the workers desk partition (pg. 35). The second is a more detailed outline that's links the principles, reflective questions and tools/ techniques in more depth.

It is anticipated that practitioners use this section to guide them to access the tools they need and reflect on the quality of their practice. It is expected that managers will use it to support reflection in individual or group supervision and to reflect on the quality of practice and decision making in their teams and services.

Connolly M (2007) 'Practice Frameworks: Conceptual Maps to Guide Interventions in Child Welfare' *British Journal of Social Work* (2007) 37, 825–837

Our principles	Engagement and assessment	Seeking solutions	Securing safety and belonging	Becoming an adult	Looking after myself
Child/Young person centered	Are we building a relationship with the child within which we are clear about their views and experiences?	Is the child clear why we're involved and have they been actively involved in identifying solutions?	Do we continue to obtain the child's views and understand their experiences as the case evolves?	Is the young person fully informed and making their own choices about their future?	Am I thinking about what I need from supervision?
Family led	Is all contact with the family respectful and do we understand the views of everyone in the family?	Is the family taking the lead in identifying the plan?	Do the plans recognise and make use of all the people who are naturally connected to the child?	Are we supporting the young person to develop their independent network of support?	Am I accessing work and professional networks to improve my practice?
Solution focused	Are we carefully crafting questions to enable us to be clear about the strengths and resources within the family?	Are we using solution focused questioning to help families reflect and build on existing safety?	Are we using solution focused questions to review safety, wellbeing and success and to reinforce positive change	Are we using solution focused questions to help the young person identify their aspirations and how they will reach these?	Am I clear about my own strengths, goals and what I need in order to achieve my goals?
Evidence based	Are our judgements based on specific, observable behaviours and is the weight given to the worries and strengths supported by research?	Are the safety plans rigorously tested out in relation to trigger points/signs of relapse etc?	Are judgements about safety, wellbeing and success based on specific observable behaviours and on the child's voice?	Are the young person's aspirations grounded?	Am I continuing to learn from research, from my own successes and mistakes and from others?
Risk sensible	Do we have a clear and rigorous understanding of past harm, likely future danger, strengths and safety within the family?	Does the safety plan ensure safety for the child in those moments when parents make mistakes/ relapse/get things wrong?	Are we managing the tension between giving the family every opportunity vs the child's timeframe?	Are we managing the balance between independence and support?	Am I taking steps to maintain a healthy work/life balance?
Focused and purposeful	Are we clear about what we are trying to achieve each time we have contact with the family?	Is there a clear, understood trajectory setting out what will happen at every stage until case closure?	Are we continuing to ensure that all our activity is helping to drive things towards the child's safety, wellbeing or success goal?	Do we have a clear, agreed timeline for each young person's transition into independence and adulthood?	Am I clear about my personal work objectives and priorities?

Using Signs of Safety alongside statutory guidance

Signs of Safety provides us with a relationship based approach to working with children and families that does not minimise or dismiss the harm that children have or may experience. However, we must always work within the requirements of the law and its associated statutory guidance. Working Together to Safeguard Children 2018 is issued under the Local Authority Social Services Act 1970 and The Children Act 2004 and therefore must be followed. This chapter sets out how to use Signs of Safety alongside the statutory requirements of Working Together to Safeguard Children 2018. In essence, Working Together to Safeguard Children 2018 sets out what we must do and the Signs of Safety approach helps with how to do it. Careful consideration has been given to how the two align and this chapter aims to help practitioners and their managers understand how to use Signs of Safety whilst also meeting the statutory requirements.

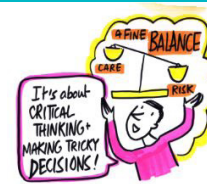

Flow chart 1: Action taken when a child is referred to local authority children's social care services

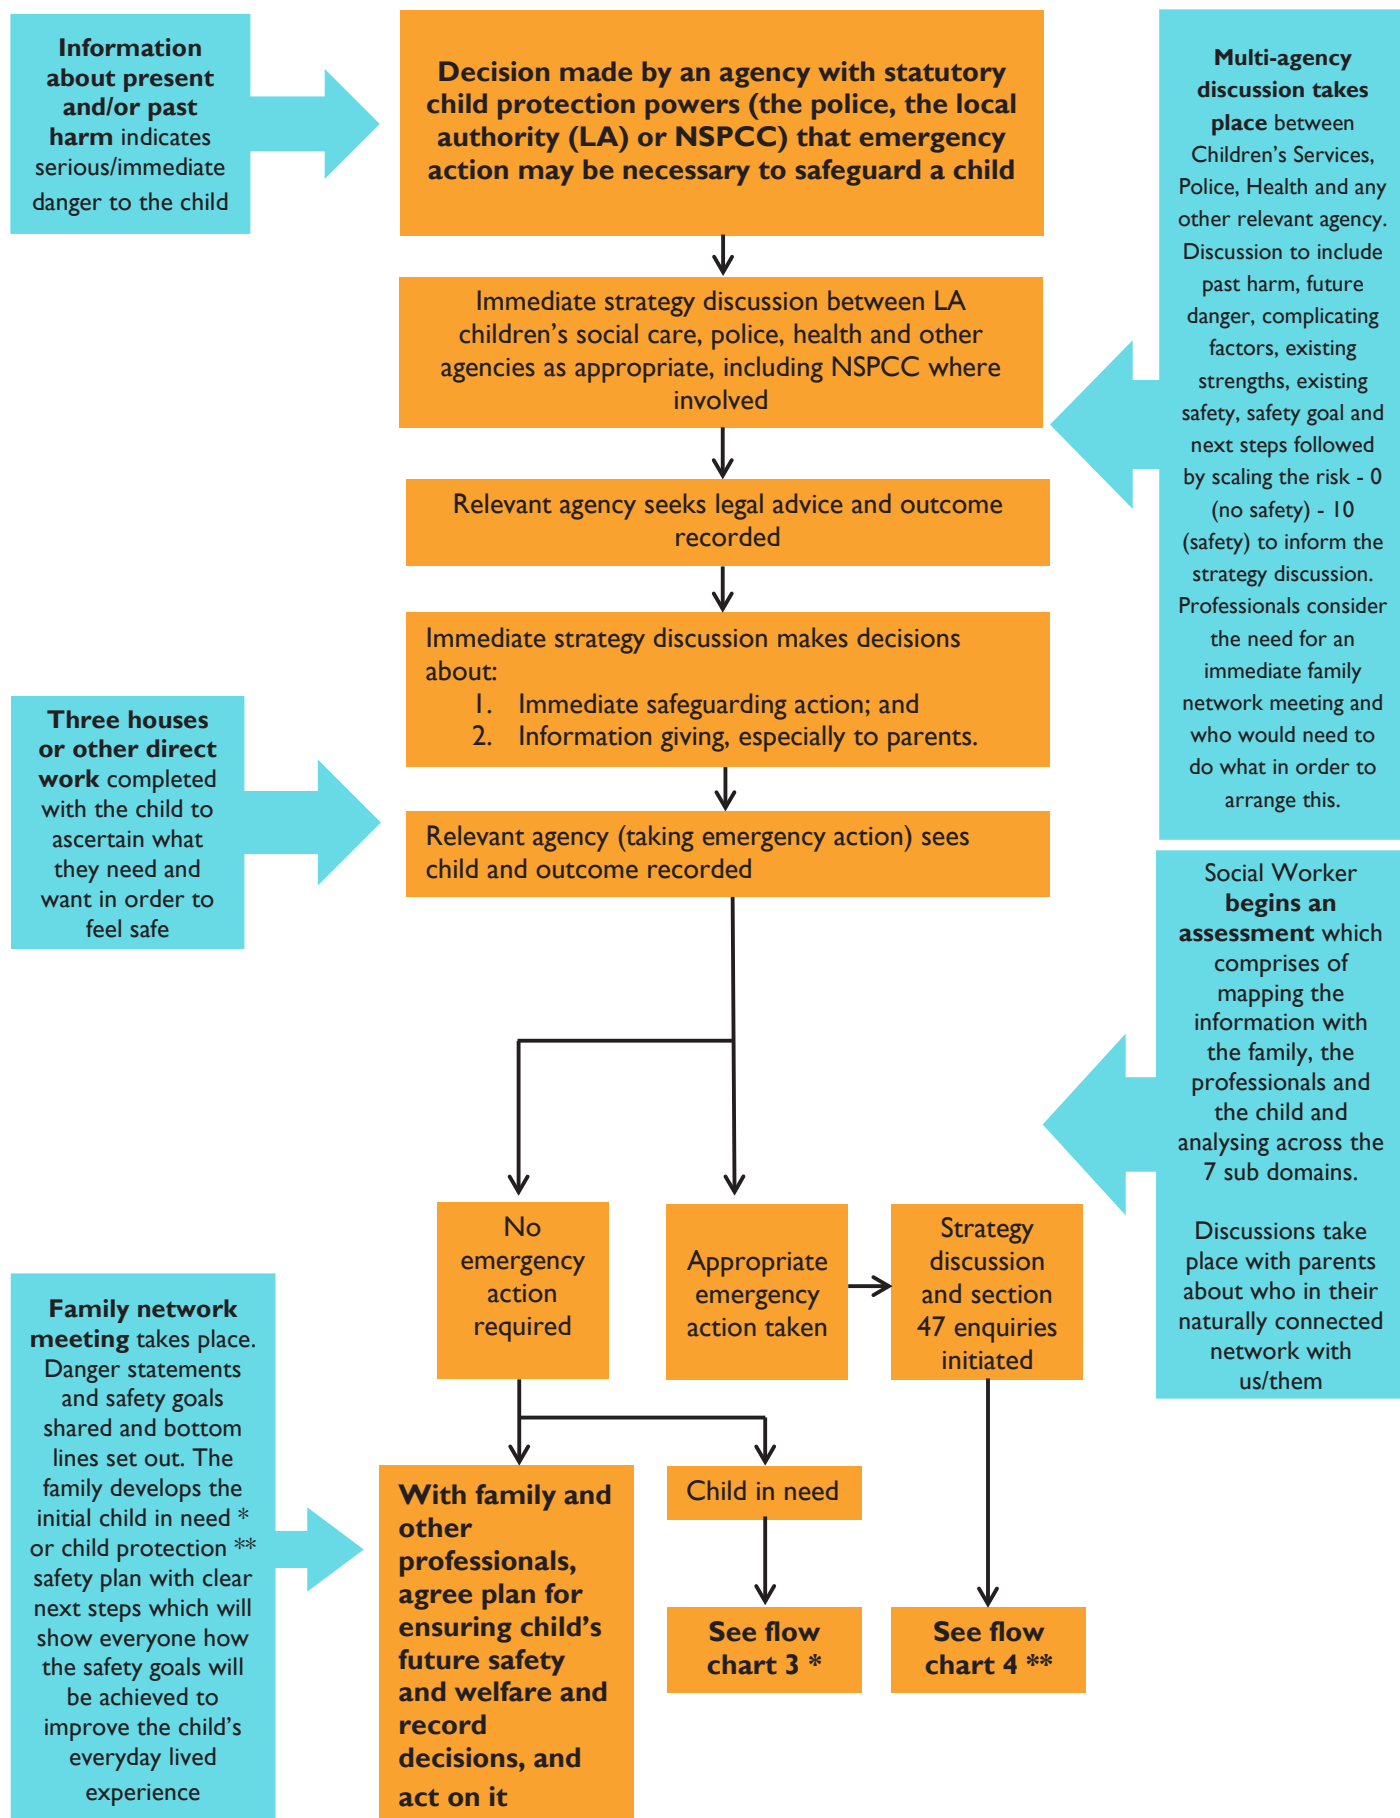

Box Colour Key:

- Orange** – Statutory guidance (unchanged from Working Together 2018)
- Blue** – Bexley Signs of Safety Practice guidance
- Green** – Bexley Practice notes
- Pink** – Exceptional circumstances
- Purple** – Family Well-being Service

Flow chart 2: Immediate Protection

Flow chart 3: Action taken for an assessment of a child under the Children Act 1989

Social Worker begins (or continues from Section 47) an assessment. Information from the family, the child and other professionals is mapped and analysed across the 7 sub domains in order to make decisions about next steps (practitioners may also consider the three domains of the assessment framework 'triangle').

Three houses or other direct work is completed with the child to ascertain what they need and want in order to feel safe

Assessment, led by a social worker, completed in line with the local protocol, including a decision on course of action **within one working day of referral** followed by a timely assessment based on the needs of the child **within 45 working days**** of the point of referral into LA children's social care

Feedback to referrer

*** PRACTICE NOTE

In Bexley, we work for timeliness in accordance with the presenting risk. Managers will agree accordingly but we aim to understand families through the assessment (case mapping) in a timeframe that is in the child's best interests.

No LA children's social care support required but other action may be necessary e.g. onward referral for help to child and family; referral for an early help assessment

LA children's social care support required

*** PRACTICE NOTE

In Bexley, following a serious case review in 2018, we learned that social workers and team managers must carefully consider how often a child in need plan is reviewed and that this must be in accordance with the degree of uncertainty about a child's safety and welfare.

Danger statement and safety goals (including for child in need) shared and further developed with the family. Discussions with family about who in their network will work with them/us to develop a child in need safety plan

Family network meeting takes place; draft danger statements and safety goals and bottom lines set out and family develops the child in need safety plan to meet the safety goals

Words and pictures safety plan/house and/or explanation takes place with the child

Trajectory setting out timeline to case closure agreed with family and professionals

Social Worker discusses next steps including **review/decision points***** with child, family and colleagues

Assessment continues; services provided if appropriate

Social worker with family/other professionals agrees next steps within **45 ** working days** e.g. could agree the Children in Need (CIN) plan or Child Protection (CP) plan. Coordinates provision of appropriate services

Review plan and outcomes for child and when appropriate refer to non-statutory services e.g. 'step down'; or refer for section 47 enquiries or close the case

No actual or likely significant harm

Actual or likely significant harm

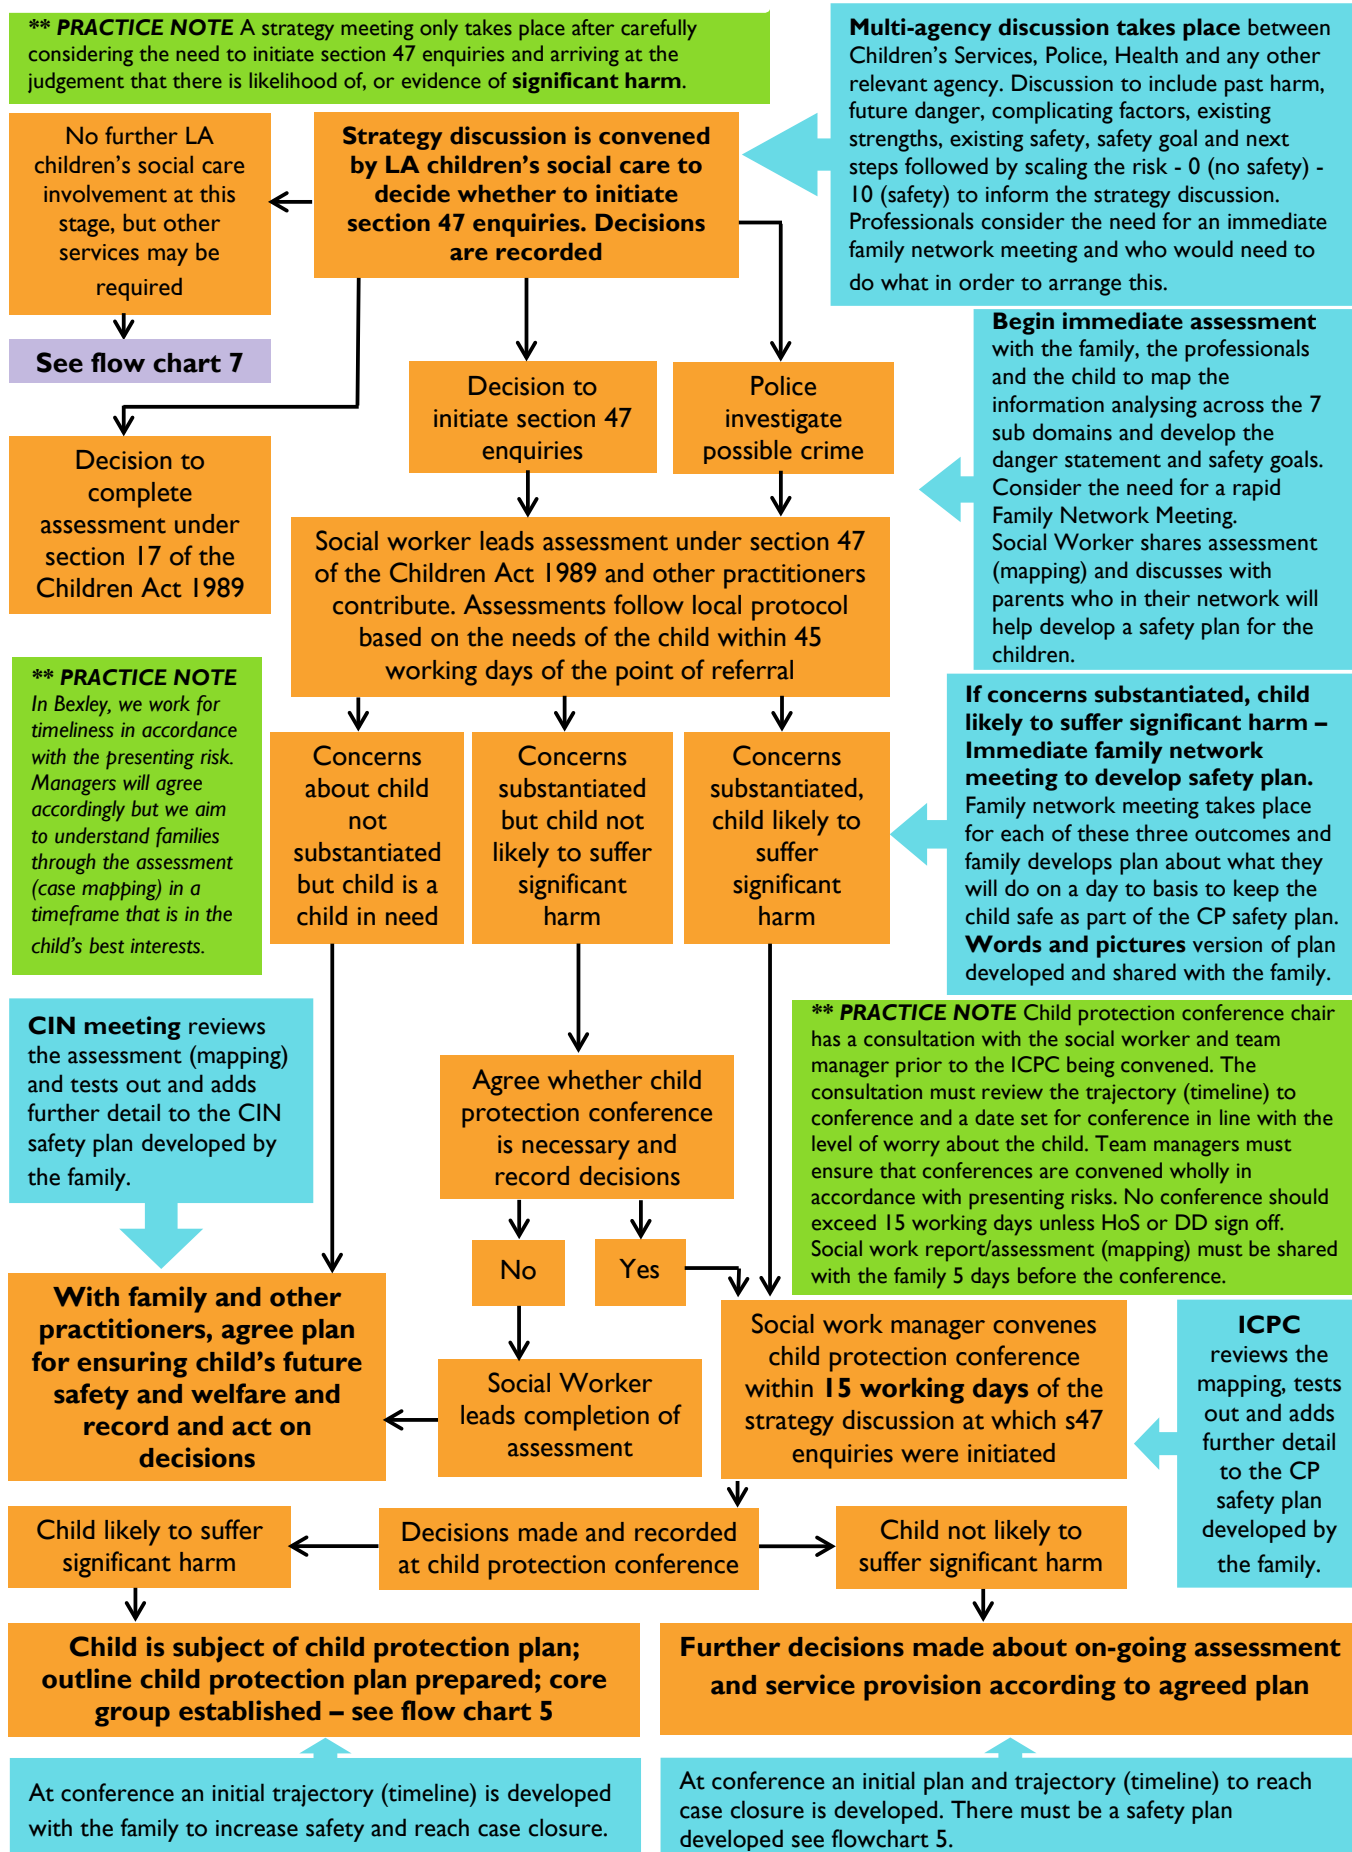

See flow chart 4

Suspect significant harm

Review Family network meetings review safety and scale 0-10 for safety against progress towards the safety goal

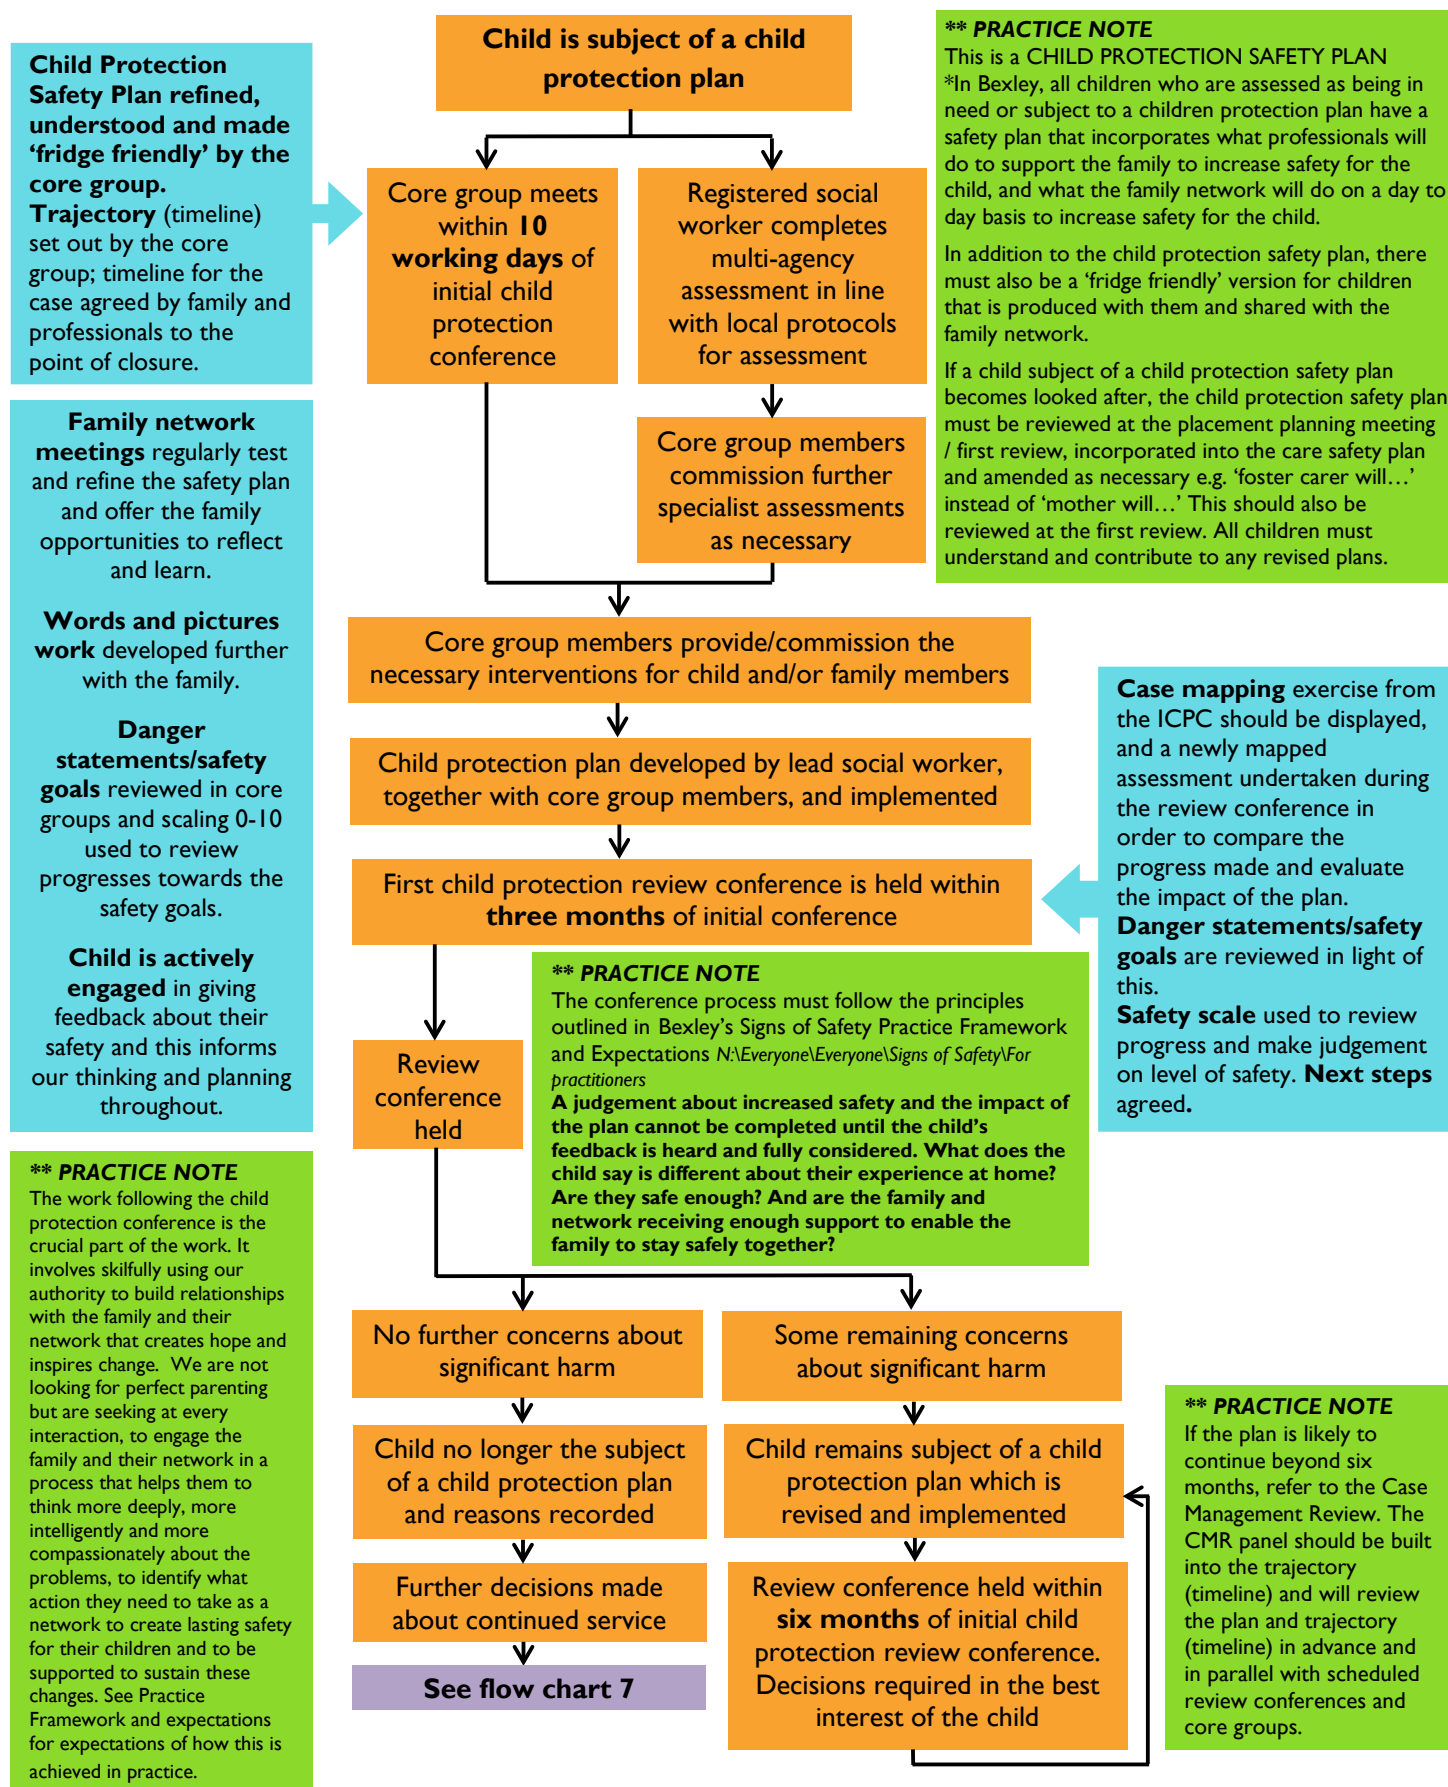

Flow chart 4: Action following a strategy discussion

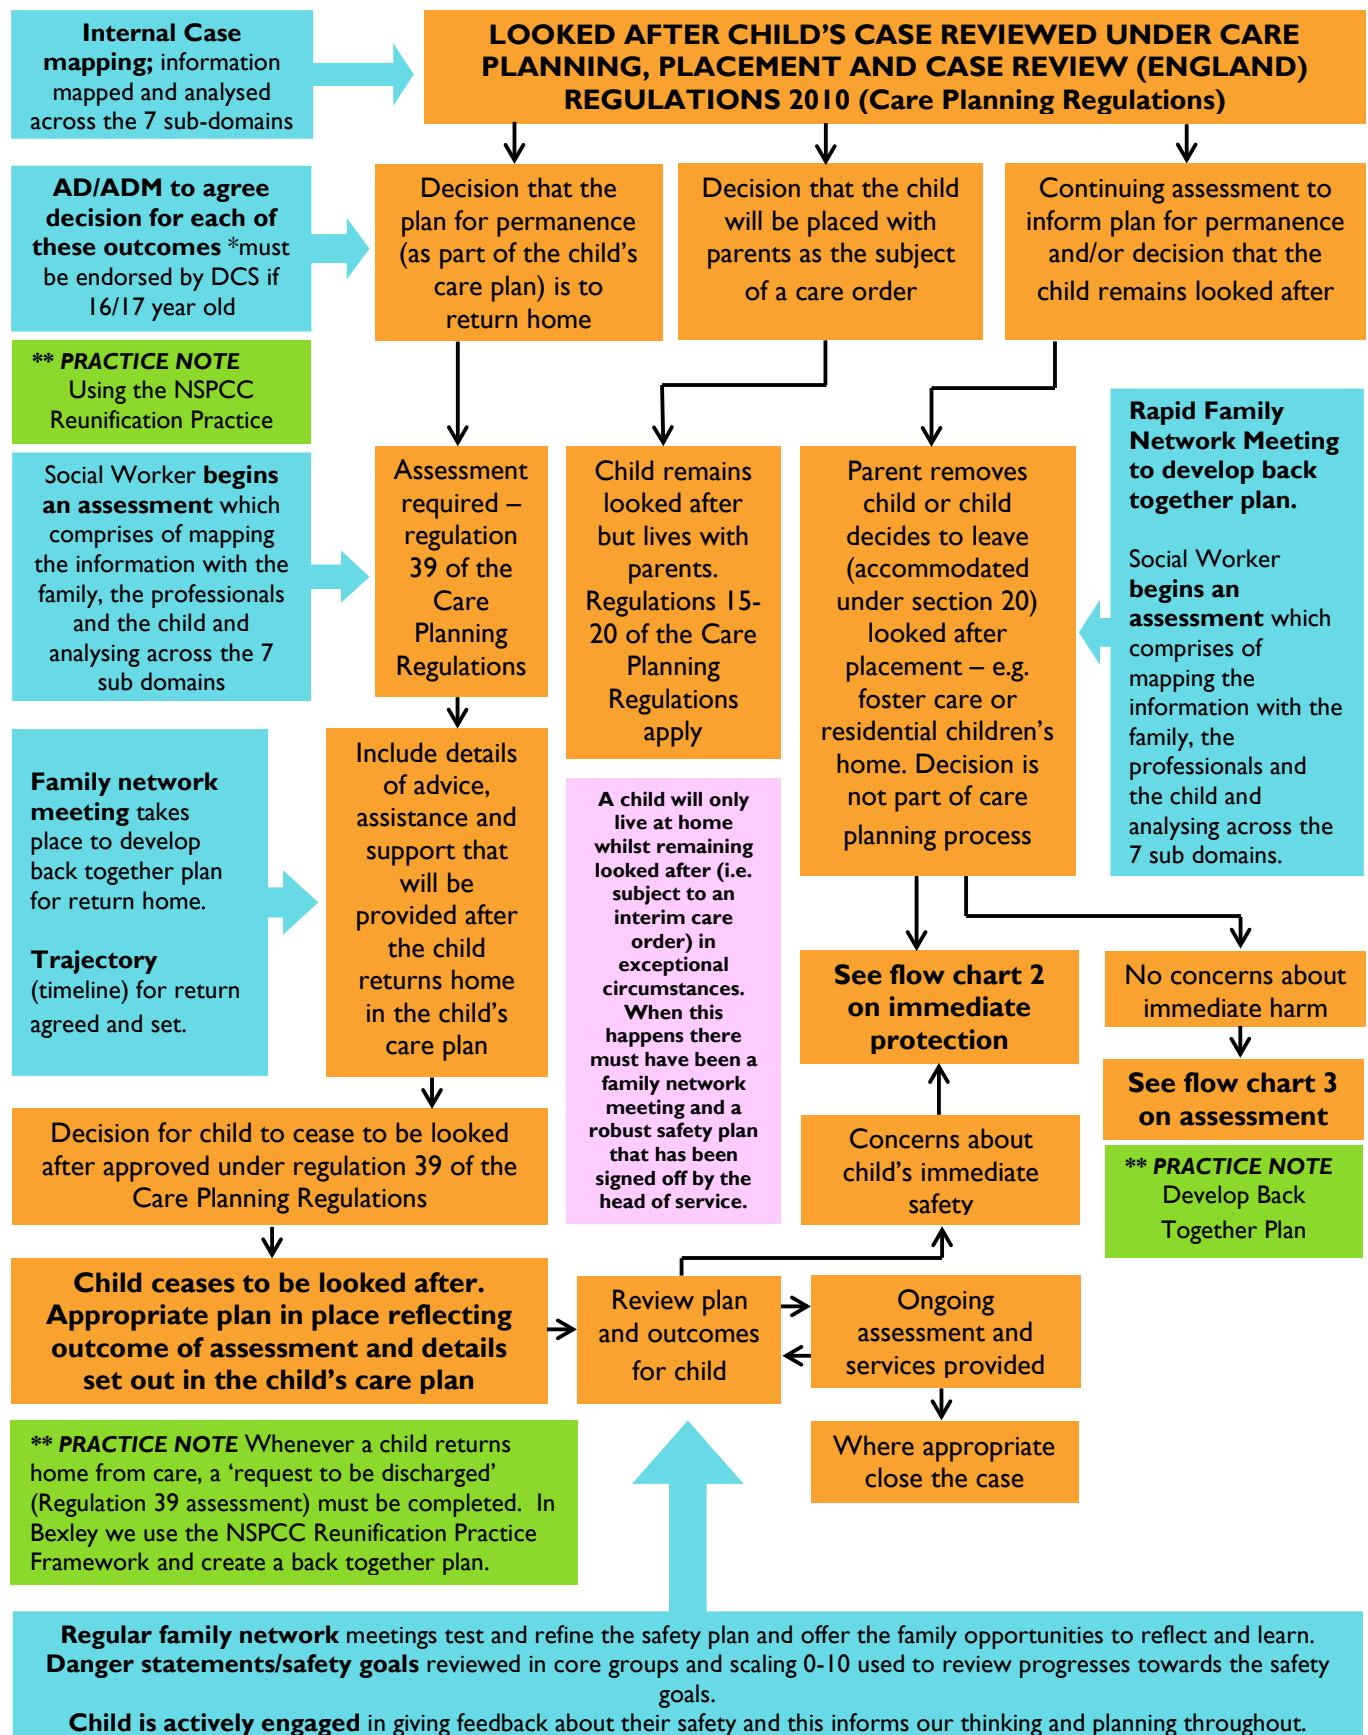

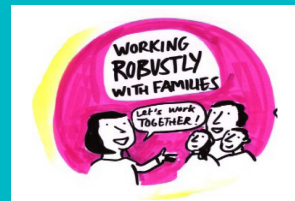

Flow chart 5: What happens after the child protection conference, including the review?

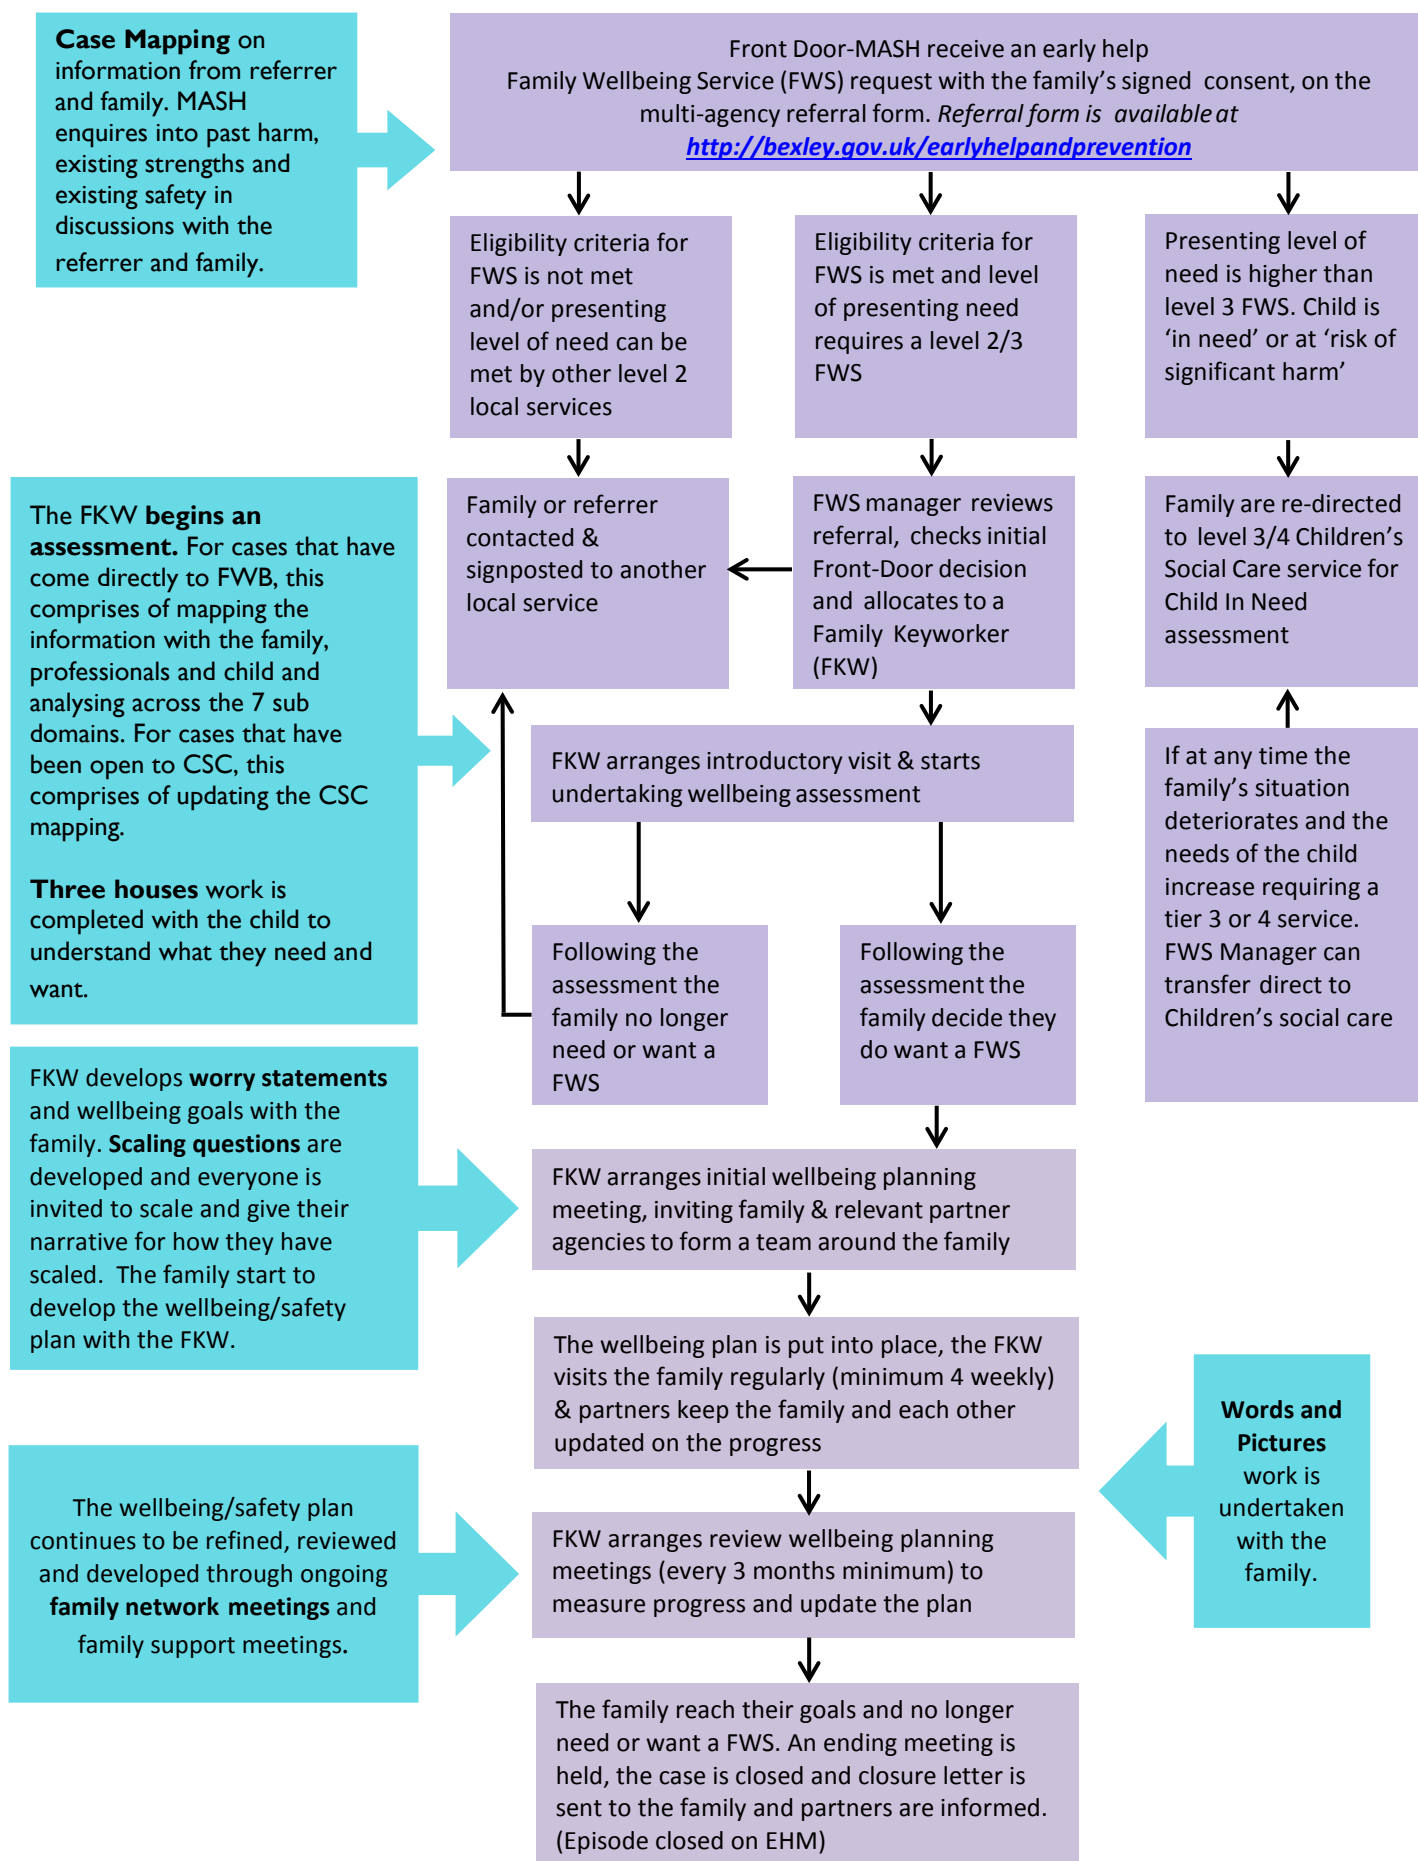

Flow chart 6: Children returning home from care to their families

Flow chart 7: Family Wellbeing Process
