## Signs of Safety:

### **MULTI-Agency Support Panel (MASP) Briefing**

Leicester City Council have implemented a Signs of Safety approach for work with children and young people. -The Signs of Safety approach will be used to support referrals, assessments, reviews and a range of other multi-agency activity.

The MASP Panel process will bring together a range of views and 'best thinking' and will also allow for,

- An interactive group mapping exercise which allows for a better understanding of the current situation, (including what is working well, what are we worried about and what needs to happen next steps)
- A collaborative decision making process, including the use of a scaling question
- Identification of workable timescales and progression of actions without delay

The panel will compromise of the following people:			
Early Help Service Manager	Social Care – DAS Team Manager	Adult Mental Health Team Leader	
Representative from CAMHS	Barnardo's - Team Manager	Senior Educational Psychologist	
EWS Assistant Principal Officer	Team Manager – Youth Justice	LPT Senior Safeguarding Practitioner	
Representative from CRASBU	District Housing Manager		

# Nb. Families are also invited alongside any agencies working with the families that are not part of the core MASP Panel.

Signs of Safety uses an interactive mapping process to assist with thinking and analysis with a child / family situation.

The referrer will still complete the MASP referral form as the background information is required to fully understand what the current situation is for the family. The mapping template is completed in addition to the referral to ensure the key points and concerns are highlighted to inform discussion, analysis and decision making.

The panel will be chaired by a Service Manager who will be the lead facilitator and will be supported by the panel.

The chair will be supported by EH Business Support Officer who will take notes (The chair however may choose to take notes themselves).

Business Support will be present to provide administration support, process record and update Liquid Logic.

#### Panel agenda:

Activity	Lead
Introductions & apologies	Chair
Brief overview of Signs of Safety and the process of the panel	Chair Referrer
Workers goal / best hopes	
Background information / Summary	Referrer
4 minutes for the worker to describe why they are currently involved with the family (key	
issues / clear and concise summary using the mapping template completed in advance with the MASP referral)	
Mapping & Scaling:	Chair
Facilitated questions to the worker, to establish information for the following areas:	
<ul> <li>What are we worried about? (past harm/wellbeing/ future danger / complicating factors)</li> </ul>	Information recorded by
<ul> <li>What's working well? (existing strengths and positive aspects of the situation)</li> </ul>	Business Support
<ul> <li>What needs to happen? (What do we need to see &amp; how will it happen?)</li> </ul>	
Scaling	
MASP members are asked to contribute any new information, analysis, questions etc. The	
family are also invited to contribute.	
Summary / Next steps:	Chair
<ul> <li>Clarification of recommended actions, suggested timescales and allocation of agreed actions</li> </ul>	
This will also include feedback to the family	
<ul> <li>Revisit the workers goal – scaling the process for the worker</li> </ul>	

What are we worried about? (Wellbeing, potential harm and future danger)	What is working well? (Strengths and demonstrated safety)	What needs to happen? (Next steps)
What has happened, what have you seen that makes you worried about the child / YP? (What is the behaviour, severity of the behaviour and impact on the child / YP?)	What is going well for the child & family? When have things worked well for the family - What was happening	<b>Establishing the safety /wellbeing goal:</b> What would it look like for social care to feel satisfied that the case is 'safe'? What would we need to see happening
Describe the first, last and worst incident of concern / harm? How has this impacted on the child / YP?	then? What were they doing? Who helps the family?	to keep the child safe? What do the child / family think to needs to happen?
Are there complicating factors? – Are there things happening in the families lives that make the situation harder to	Who would the child say is the most important to them and why? Who do parents turn to for support	What do other agencies need to see happening?
deal with? (e.g. housing issues / financial difficulties, / parental mental ill health / social isolation etc.)	when things are difficult?	<b>Next steps:</b> What actions are needed to help us to get to the safety /wellbeing goal?
What could happen in the future that could cause CONCERN?		

'On a scale of 0 - 10, where 0 is that the panel are so concerned they need to reconsider the status of the case and whether a EHA is still appropriate, and 10 is that the case can be closed to EH, where would you scale yourself?'. The panel may then be asked.....

- What places you as high as your number on the scale?
- What would you need to see to make you one point higher on the scale?
- Where would the child / family / other agency / school / etc. place themselves on the scale?

The panel will then consider and confirm the next steps and timescales for actions.
