Guidance for:
Health Visiting Team Leaders on
Managing Caseloads without a HV currently at work.

1. Scope

This guidance covers the following scenarios:
- Vacant caseloads.
- HVs who are absent for work due to holiday, sickness, care, commitments, maternity leave and any other form of authorized or unauthorized absence.

2. Vacant Caseloads

2.1 On receiving the HVs resignation/termination the Team Leader will complete the following before the staff member leaves service:
- Inform Management and HR so due process can take place in relation to resignation/termination.
- Work with Manager and overall service Budget Holder to agree best arrangements in terms of replacement – reviewing hours and any consideration to skill mix etc.
- Work with Manager to instigate and follow through recruitment processes.
- Work with resigning health visitor to bring all records up to date.
- Identify with the resigning health visitor families requiring a Universal Plus and Universal Partnership Plus service then arrange allocation and handover to another member of the team before HV leaves service.
- Identify outstanding Healthy Child Programme contacts on resigning HV caseload and work with staff member to get as many completed as possible.
- Ensure staff member hands back any Swindon property and equipment including lap top, phones, scales, ID Badges etc.

2.2 In the first week following the staff member leaving Swindon employment the Team Leader will:
- Review the vacant caseload, ensure that all families who have been identified as requiring a Universal Plus or Universal Partnership Plus service have been allocated to another member of the team.
- Review the overall caseloads of the team, identify any spare capacity and allocate universal families to those team members.
- Arrange with Capita Manager (Allison Dudley) to transfer families identified as receiving a universal service from the staff member who has left to themselves (Team Leader), making a note of when the block transfer happened. This will ensure that when the post is filled the caseload can be easily identified and re-allocated.
- Ensure that the previous staff member is removed from the list of active health visitors.

2.3 Ongoing responsibilities of the Team Leader in relation to the caseload:
- Deal with any correspondence or notifications in relation to the caseload, paying particular attention to any information that would indicate a need to change the status of the family from requiring a Universal service to Universal Plus or Universal Partnership Plus.
Allocate any family to another member of the team for whom concerns indicate a need to review or step up the service they receive.

Send out letters to all families for whom a Healthy Child Programme is due inviting them to attend a drop-in activity (clinic, infant feeding group or alternative) or phone if they have any concerns (template for letter on N Drive).

Arrange for one of the team members to conduct a face to face Healthy Child Programme contact if families make the request.

Consider how the team will manage the increased pressure because of the vacancy – see flow chart section 4.

3. Caseloads where health visitor is in Swindon employment but not currently at work.

3.1 Caseloads that are not covered for less than two weeks:
- Team Leader to ensure that appropriate, “out of office”, notifications are in place.
- Team leader to review any urgent information or requests that are redirected particularly those that relate to safeguarding concerns or on a vulnerable child and ensure appropriate action is taken.

3.2 Caseloads that are not covered for two to eight weeks:
- Team Leader to ensure that appropriate, “out of office”, notifications are in place.
- Team leader to review any urgent information or requests that are redirected particularly those that relate to safeguarding concerns or on a vulnerable child and ensure appropriate action is taken.
- Team leader to actively review all information or requests that come in about children on the caseload. This will include looking at pediatric letters, out of hour’s attendances, Emergency department notifications, two year review from early year settings, workflows. Team Leader to ensure that suitable action is taken and this may include re-allocating the family to another member of the team.
- Consider how the team will manage the increased pressure because of the vacancy – see flow chart section 4.

3.3 Caseloads that are not covered for more than eight weeks:
- If the leave of absence is planned and known in advance e.g. maternity leave or planned surgery, then the Team Leader should follow the same process as for resignation outlined in point two ensuring that the universal caseload is transferred to the Team Leader as soon as the staff member goes on maternity leave. It will be transferred back once the staff member returns or when a temporary staff member is in place as the service is able to recruit on a fixed term contact cover for up to 50% of maternity leave.
- If the leave of absence is unplanned as soon as it is apparent the leave will extend beyond eight weeks the Team Leader will follow the steps outlined in Points 2.2 and 2.3.

3.4 A small reduction in capacity can be held successfully within a team for a short period, when that capacity drops below 20% over an extended period of time, the resilience of the team can be comprised. Therefore a strengths based approach should be adopted recognizing balancing risk with staff resilience.

**Scenario 1**
90% or more of staff at work (10 % reduction)

- Team Leader to arrange for any work to be covered within team.
  - Options to ease workload including:
    - Send families receiving a universal service a standard letter offering phone contact or drop-in opportunity for 1 year rather than face to face HCP contact.
    - Send families a welcome letter and phone contact or drop-in opportunity when transferring in from the UK and known to require a universal service.

**Scenario 2**
80-90% or more of staff at work (More than a 10% reduction in capacity) Activate step up approach

- Prioritise those families most in need;
  - UPP families i.e. those on CP plans and CIN
  - UP families

  Minimum expected contacts
  - Targeted Antenatal UP (as identified by midwifery) & first time parents
  - All New birth contacts
  - All 6-8 weeks contacts
  - Targeted Universal Plus 9-12 month contacts (indicators DV reports, prematurity, previous low mood, parental concerns, transfer in from out of area that has't been seen)

  24-30 month contacts prioritised by need – (UPP, UP, transfer in to area not yet seen, previous developmental concerns, parental concerns)
  - All children to have had a 24-30m contact by 36mth at the latest.

  Using a strength based approach when minimum contacts are achieved the team leader and management would agree a step up in service.

  Management to consider moving HV hours between teams to ensure an equitable service is offered across Swindon.

**Support measures:**
- All teams to send families receiving a universal service a standard letter, outlining normal development and links for parents to access for development, home safety and nutrition.
- Send families a welcome letter and phone contact or drop-in opportunity when transferring in from the UK and known to require a universal service.
- Other staff teams to cover clinics, drop-ins and to pick up antenatal and new birth visits - holding families until 6 week contact completed.
- Permission to be sought to consider extra hours, overtime or use of bank staff.
- CNN to be allowed to complete 2 yr. contact.

**Management Measures**
- Consider informing partners and other stakeholders of staffing issues and agreeing an emergency service for a limited period – 1 to 1 face to face contact for New Birth Visit and vulnerable children (including safeguarding) only.
- Recruiting for fixed term contract to cover maternity leave.
Using a Step up approach:

Resume a full service

Prioritise those families most in need:
UPP families i.e. those on CP plans and CIN
UP families

All antenatal contacts
All New birth contacts
All 6-8 weeks contacts
Targeted Universal Plus 9-15 month contacts (indicators DV reports, prematurity, previous low mood, parental concerns)
Transfer in from Out of area to be seen
To aim to complete 24-30 month at 24 months, all children to have a contact by 30 months

Prioritise those families most in need;
UPP families i.e. those on CP plans and CIN
UP families

Targeted Antenatal UP (as identified by midwifery) & first time parents
All New birth contacts
All 6-8 weeks contacts
Targeted Universal Plus 9-15 month contacts (indicators DV reports, prematurity, previous low mood, parental concerns, Transfer in from out of area that hasn’t been seen)
Targeted transfer in visits & blood spots
24-30 month contacts prioritised by need – (UPP, UP, transfer in to area not yet seen, previous developmental concerns, parental concerns)
All children to have had a 24-30m contact by 36m at the latest.

Minimum contacts:
Prioritise those families most in need;
UPP families i.e. those on CP plans and CIN
UP families

Minimum expected contacts:
Targeted Antenatal UP (as identified by midwifery)
All New birth contacts
All 6-8 weeks contacts
Targeted Universal Plus 9-15 month contacts (indicators DV reports, prematurity, previous low mood, parental concerns, Transfer in from out of area that hasn’t been seen)
Targeted transfer in visits & blood spots
24-30 month contacts prioritised by need – (UPP, UP, transfer in to area not yet seen, previous developmental concerns, parental concerns)
All children to have had a 24-30m contact by 36m at the latest.

More than a 10% reduction in capacity

Resume a full service
5. Appendices Protocol for Managing Workload during Health Visitor staff shortages.

5.1 Letter for when a 9-15 month contact is not offered
5.2 Parent / guardian letter for a delayed 24-30 month contact
5.3 Welcome to Swindon – under 12 months old
5.4 Parent / Guardian Welcome to Swindon – 12-24 month
5.5 Welcome to Swindon over 24 months
5.6 Management of transfer in’s
5.1 Parent / Guardian letter for when a 9-15 month contact is not offered

Dear Parent or Guardian,

Your child is nearly one!

At the current time we are not able to offer home visits to all one year olds.

However, we have compiled a list of things your child should be doing at this age and some useful websites you may be interested in, and if you have any concerns you wish to discuss please contact your named Health Visitor whose number is above.

At a one year contact we would talk about your child’s development. We would be expecting your child to be able to:

- Sit, crawl or bum shuffle around the room, possibly starting to pull themselves up on furniture and taking steps using the furniture for support.
- Babble, making sounds and noises
- Eating finger foods
- Drinking water or milk from a cup

A useful guide to child development kind be found at:

http://www.nhs.uk/Tools/Pages/birthtofive.aspx

A good guide to what children should be eating, drinking and portion size is, The Nutrition Trust

http://www.firststepsnutrition.org/newpages/Infants/infants_and_new_mums.html

Thinking about your child’s health

If they are formula feeding, you can now give them full fat cow’s milk to drink instead of formula. You would also need to give them vitamin D a daily, your pharmacist can advise you which product is best for your child. If you are breast feeding continue to give vitamin D daily.

You need to start looking after your child’s teeth, brush them twice a day with a child tooth brush and toothpaste, avoid sugary or fizzy drinks, this includes fruit juice. Water or milk are the best drinks for your child. More information can be found on:

As your child grows and develops, they can access different risks within your home. This is a video clip which can help you think about preventing accidents in your home.

http://www.nhs.uk/video/Pages/Accidentprevention.aspx

As your child is now starting to interact with others, taking them to a baby and toddler groups is good for their interaction and development and helps you meet other parents.

If you have any worries or concerns about your child, or would like support around diet, sleep or behaviour please call the phone number at the top of this page.

Yours faithfully
Dear Parent or Guardian,

Your Child is two!

At the current time we are delaying our 24-30 month contact, we hope to have seen you and your child by the age of 36 months.

However, we have compiled a list of things your child should be doing at this age and some useful websites you may be interested in, and if you have any concerns you wish to discuss please contact your named Health Visitor whose number is above.

At a two year contact we would talk about your child’s development. We would be expecting your child to be:

- Walking and running
- Kick a ball
- Using pretend play, pretending to make you drinks, food, or pretending to make phone calls
- Copying things you do in the home, pretending to clean things up
- Eating a variety of foods
- Sleeping through the night

A useful guide to child development kind be found at:

http://www.nhs.uk/Tools/Pages/birthtofive.aspx

I can talk! A website to help you support your child with speech and language development

http://www.talkingpoint.org.uk/

Your child should be starting to follow basic instructions, ‘get your coat’, Joining 2 words together and copying new words. If your child has a stutter please contact us straight away.

A good guide to what children should be eating, drinking and portion size is, the nutrition trust

http://www.firststepsnutrition.org/newpages/Early_Years/eating_well-early_years.html

Children should be:

- Drinking out of a cup, water or milk, squash and fizzy drinks will damage your child’s teeth.
- This is the age for being a fussy eater, make healthy choices for your child and stick to it, don’t offer alternatives.
- Think about child size portions.

Thinking about your child’s health

Dated 30/5/17
Review date – March 2018
All children who are drinking cow’s milk or breast feeding should be taking vitamin D 10ug once daily.

You need to start looking after your child’s teeth, brush them twice a day with a child tooth brush and toothpaste, avoid sugary or fizzy drinks, this includes fruit juice. Water or milk are the best drinks for your child. More information can be found on:

As your child grows and develops, they can access different risks within your home. This website helps you to think about how to prevent accidents in your home.

https://www.capt.org.uk/Pages/Category/safety-advice-injury-types

Going to toddler groups helps your child develop their interactions with other children and prepares them for nursery. If you receive a ‘golden ticket’ from the council your child meets the criteria for two year funding and you will need to register them at a nursery which provides two year places. If you would like to check your eligibility for two year nursery funding to check your eligibility please call 07823 525441.

If you have any worries or concerns about your child, or would like support around diet, sleep or behaviour please call the phone number at the top of this page.

Yours faithfully
5.3 **Welcome to Swindon – under 12 months old**

Dear Parent or Guardian,

Welcome to Swindon. Health visiting is a free service for all children under the age of five years old. A health visitor is a specialist nurse who works with children and families to help support health and wellbeing.

Health visitors, support parents with children’s development, behavior, sleep, diet and nutrition, baby feeding, accessing health services and addressing worries or concerns you have with your child.

We have healthy child clinics, these are drop in clinics, if you have a concern with your baby’s development, sleep, behaviour, feeding and would like some advice. A clinic list is included with this letter.

In Swindon you will be allocated a named health visitor who will be your point of contact if you have a concern with your child around the issues above. We are not a source of advice for unwell children, for a poorly child you would see your GP or Out of hours service.

If you cannot get a GP appointment or need out of hours health advice, for an unwell child this can be accessed by;

Life threatening call 999 for an ambulance

Non urgent advice by telephone – call 111

Speaking to any pharmacist for coughs, colds, colic

**Walk in services**

Swindon Walk in Centre

[http://www.swindonwalkincentre.co.uk/](http://www.swindonwalkincentre.co.uk/) (language options available)

Urgent GP / Nurse, Clover unit, Great Western Hospital Call 01793 646466

Children’s clinic (12 weeks -18 yrs.) Mon –Fri 8am -8pm call for an appointment 03001110088

More information on local health services can be found at

Below are some useful guides to child development, nutrition and feeding support and our breast feeding support groups.

5.6 Swindon Health Visiting Service
Protocol under pinning risk assessment for families transferring in

Health visiting service becomes aware of Transfer In, this may come from various sources (child health, family, GP)
Family are allocated a named Health Visitor and the notification is given to Business support to update or create Capita 1 involvement / notify

Named Health Visitor:
Makes an initial assessment of level of HV service/contact required based on previous HV notes (if available) and age of child.
For a universal family with children who are aged over 12 months, the named Health visitor will make contact within 21 working days (This does not have to be a face to face contact)

Health visitor reads previous HV records (if available) and notes any significant issues and contacts relevant services if appropriate e.g. phone call to previous HV or social worker.
Makes contact with family – type of contact and offer of service will be dependent on previous history and age of child/children.

Families with children Under 1 Year
Internal/ universal service – letter stating named HV & contact details.
Universal service/ External - to be sent welcome letter appropriate to child’s age.
To offered a home visit within 3 weeks of HV notification of moving into area.
Bloodspot – for children where there is no evidence of previous blood spot as per protocol.

Families with Children over 1 Year
Universal
Previous HV records show no known vulnerability factors.
Internal – letter stating named HV and contact details.
External – Welcome letter, and seen for next HCP contact (12-15months)
If 12 month contacts are targeted these would be seen as a targeted child

Families with Children over 1 Year - Universal Plus or Universal Partnership Plus.
HV to allocated within 1 working day and to make contact with relevant services – including social care to identify any additional information within 2 working days e.g. if transfer in CP Conference is to be held.
After discussion with other services a plan of contact and rationale to be documented in child’s records.

Families with Children over 1 Year - records not available
External transfers into Swindon, families for whom notes are not available to be considered as a targeted group for risk assessment.
All will be sent a welcome letter appropriate to their age.
Those children under 36m will be prioritized for a 24 month contact.
Children over 36m that are not in nursery provision will be seen within 4 weeks

Dated 30/5/17
Review date – March 2018
